This excellent Institution, founded in 1817, maintains a school on an extensive scale, to educate children, and it supports and trains up young persons of both sexes for supplying properly instructed teachers to the inhabitants of such places in the British dominions, at home and abroad, as shall be desirous of establishing schools on the British system. Five training colleges are now existing, and are more particularly referred to in Vol. I. and Vol. II. under Training Colleges. These Schools and Colleges are under the direct control of the Committee of this Society, and are the following:—Borough Road Training Colleges and Schools; Practising Schools at Belvedere Place; Stockwell Training Colleges and Practising Schools; Darlington Training College; Swansea Training College; Kindergarten College and Practising School; Herold's School, Bermondsey; Rowlatt's School, Corby; Sturge's School, Northfleet; Hermitage School, Birkenhead. It instructs all persons, whether natives or foreigners, who may be sent from time to time for the purpose of being qualified as teachers in this or any other country.

*Treasurer*.—Joseph G. Barclay, Esq.

*Secretary*.—Mr. Alfred Bourne, B.A.

*Assistant Secretary*.—Mr. W. Prydderch Williams.

## BOROUGH ROAD TRAINING COLLEGE AND SCHOOLS.

Under the British and Foreign School Society five Training Colleges have been established. Those for females appear in Vol. II. 120 young men are received as Resident Students, with practising schols for 400 boys.

*Principal*.—J. C. Curtis, B.A.

*Secretary*.—Mr. Alfred Bourne, British and Foreign School Society's House, Borough Road, London, S.E.

## BANGOR NORMAL COLLEGE.

For the training of teachers for British Schools in Wales.

Thirty teachers are sent out every year, and are all immediately placed in schools.

The Institution is under the government of a Committee, consisting of forty-eight members, elected by the subscribers.

Every donor of 10*l.* or upwards, and every annual subscriber of 1*l.* or upwards, are eligible for election.

Every donor of 5*l.* or upwards, and every annual subscriber of 10*s.* or upwards, are entitled each to a vote.

## NATIONAL SOCIETY'S TRAINING COLLEGE FOR SOUTH WALES & MONMOUTHSHIRE, CARMARTHEN.

This College was established in 1848, and it trains and maintains, for 2 years, young men over seventeen years of age, and who pass the Government Examination in July of each year, on payment of an entrance fee of 10*l.* Candidates for admission are expected to read English Prose with propriety; to spell correctly from dictation; to write a good hand; to be well acquainted with the outlines of Scripture History, and with the Catechism and Liturgy of the English Church; and to show considerable readiness in working the fundamental rules of Arithmetic. Candidates are also examined in the grammatical construction of sentences, in History and Geography, and in the rudiments of Mathematical Science. A knowledge of Vocal or Instrumental Music is always a strong recommendation to a candidate. Science Classes in Animal Physiology, Physical Geography, Mechanics, etc., are held at the College in connection with the Science and Art Department. About 60 students are here at a time. Vacations, 12 weeks in the year.

*Principal.*—C. Gilbert Browne, B.A., London University.

*Vice-Principal.*—J. H. Oldroyd, B.A.

Assisted by three resident and one non-resident Master.

---

## NORTH WALES TRAINING COLLEGE, CARNARVON.

In this College young men are trained to be Masters of National Schools. If students pass at the annual examination by the Government Inspector, they are admitted as Queen's Scholars without entrance fee. They subsequently pay 10*s.* a quarter "caution money," which is returned to them, with 6*l.* added, on their obtaining their certificate. As Queen's Scholars, they are maintained and educated gratis for 2 years. The other Students also reside within the College.

*Principal.*—The Rev. J. S. Boucher, M.A.

With assistant Masters.

## TRAINING COLLEGE FOR SCHOOLMASTERS, CHELTENHAM.

This College was established in 1847, for the education of 90 young men, from eighteen years of age, who are admitted after passing an Entrance Examination held annually in December. Has a few Exhibitions, tenable for one year, in the College, of 5*l.* each. Vacations, 12 weeks.

*Principal.*—The Rev. R. M. Chamney, M.A.

*Vice-Principal.*—E. W. Brereton, M.A.

## OXFORD DIOCESAN TRAINING COLLEGE, CULHAM,

OXFORDSHIRE, NEAR ABINGDON.

This College was established in 1852, to train Masters for Church of England Schools. Three-fourths of expenses are defrayed by the Committee of Council on Education, and the rest from private contributions. Entrance after examination. Those passing the Government "Queen's Scholarship Examination," who pledge themselves to complete two years' training, and to stay two years continuously in one School under Government inspection, are charged 10*l.* 10*s.* per ann., and no other fees are required of them. Private students in training for Schoolmasters pay 50*l.* per ann. The College contains about 80 students, from eighteen years upwards. There are several Exhibitions open to the competition of the students.

*Principal.*—The Rev. Henry Lewis, M.A.

---

## THE COLLEGE, CHESTER.

In addition to training Students as Schoolmasters, pupils are also prepared for the Universities, for Civil Service, Military, Professional, and other Examinations, at the rate of 14*l.* to 17*l.* per term for board and education. 3 terms to the year. The education at this School is of the most sound and practical character, fitting pupils for any position in life.

*Principal.*—The Rev. J. M. Critchley, LL.D

With resident assistant Masters.

## DIOCESAN TRAINING COLLEGE FOR MASTERS, DURHAM.

The object of the Training College is to prepare young men to become the Masters of Elementary Schools for the children of the labouring classes; and their training lasts for two years, of which each year is closed with an Examination conducted by one of Her Majesty's Inspectors of Schools.

Residence is commenced in the month of January—usually about the last Monday—according to the arrangements of the Committee of Privy Council on Education, and an Entrance Examination is held in the preceding July, embracing the following subjects:—Holy Scripture, the Prayer Book, and the Catechism; English Grammar and Composition; the Outlines of English History; Geography, especially of the British Empire; School Management and Music; Arithmetic and Mensuration; Algebra and Euclid, Books i. and ii.

Questions are also set in Latin, French, Greek, and German; but these are not absolutely essential.

The Examination in Religious Knowledge is conducted by the College authorities, and is held as soon as the Government Examination in secular subjects is concluded. It consists of one paper containing questions on the Old Testament, the Gospels, the Order for Morning and Evening Prayer, the Litany and Catechism. A prize of 3*l.* is given by the Society for Promoting Christian Knowledge, and 1*l.* by the Durham Diocesan Society, to every candidate who obtains a first class in this subject.

Successful candidates sign an agreement to reside for the full course of two years, and to become teachers in schools under Government Inspection; and they are admitted on payment of 5*l.* at the time of admission, and 5*l.* in December following.

At the conclusion of their training the Students are recommended to Elementary Schools, a due regard being had to their conduct, their attainments, and their practical skill as teachers. It ought, however, to be added that no Student receives a recommendation unless the authorities are satisfied that he is fitted—not only as to ability, but also as to character—for the responsible office of a schoolmaster.

Candidates for admission should be communicants of the Church of England, of not less than eighteen years of age, and should accompany their applications by (1) Testimonials as to character from the clergyman of the parish; (2) Certificate of baptism; (3) Certificate of health from a surgeon.

*Principal.*—The Rev. S. B. Smith, M.A., Oxon.

*Vice-Principal.*—Rev. A. Watts.

*Tutor.*—Mr. A. Currie.

## PETERBOROUGH, S. PETER'S.

*Principal.*—The Rev. Charles Daymond, M.A.

## DIOCESAN TRAINING COLLEGE, EXETER.

This College was established in 1840. Endowment, 100*l.* Young men from eighteen years old are trained to be Schoolmasters in the Elementary Schools of the Church of England. The College is supported by Government grants, by payments of pupils, and by annual subscriptions. There are two classes of students: Queen's Scholars, or those who, whether they have been pupil teachers or not, pass the Competitive Examination of candidates for admission, held annually in the month of December by the Committee of Council on Education; and Private Students, or those who decline, or fail in, or are preparing for the Examination for admission, but who desire to be trained as Schoolmasters for one year or longer. Queen's Scholars are admitted without payment, the cost of their board and education being borne by the Government on their fulfilment of certain conditions. Private Students pay 23*l.* per ann. The period of training is, for Queen's Scholars, two years; for Private Students, one year or longer, as may be agreed on or be deemed advisable. Vacations at Midsummer and Christmas, of from 5 to 6 weeks each.

*Principal.*—The Rev. J. G. Dangar, M.A., S. John's College, Oxford.  
With six assistant Masters.

---

## WORCESTER, LICHFIELD, AND HEREFORD TRAINING COLLEGE, SALTLEY, NEAR BIRMINGHAM.

This College was opened in 1852. It derives three-fourths of its income from Government grants. Instruction is given to 100 young men from eighteen years upwards, who, having passed a Government Admission Examination (held annually in July), are maintained free and prepared for School Teaching. Application for admission should be made to the Principal, accompanied by testimonials to good character, health, and aptitude for teaching. Each candidate pays an admission fee of 12*l.* 10*s.*, and declares his *bonâ fide* intention of becoming a teacher. Scholarships are tenable for two years. Vacations, 13 weeks.

*Principal.*—Rev. F. W. Burbidge, M.A.  
Aided by three resident and five non-resident Lecturers.

## TRINITY COLLEGE, WINCHESTER.

This College was founded in 1840 as a Government Training College, and the course of education consists of the usual curriculum observed Training Colleges. About 56 Students attend, and are admitted after passing Queen's Scholarship Examinations and completing apprenticeship as pupil teachers. The examinations are in July for entrance and in December for certificates. A fuller account will be given in the next edition.

*Principal.*—The Rev. H. Martin, M.A.  
*Vice-Principal.*—The Rev. J. Hayworth B.A.  
With three assistant Masters.

## THE YORK DIOCESAN TRAINING COLLEGE, YORK.

At this College, Students are trained for teaching in Parochial Schools, and it is under Government inspection. In the College there are about seventy Students, who, being eighteen years of age, are admitted after an Examination commencing on the Tuesday after the 2nd July in each year. Each Student pays 5*l.* in advance per annum, and must reside two years (receiving both maintenance and instruction). Attached is the York Model School (Middle Class) for day-boys, and the York Practising School, an Elementary School in which the Students practise the art of teaching.

*Principal.*—The Rev. G. W. de C. Baldwin, M.A.

Assisted by a Vice-Principal and several assistant Masters.

## CHURCH OF SCOTLAND TRAINING COLLEGES.

The Church of Scotland has three Training Colleges; these are situated in Edinburgh, Glasgow, and Aberdeen. Those in Edinburgh and Glasgow are double Colleges; that is to say, they train both Masters and Mistresses. Aberdeen is for female Students only. Accordingly, the number of single Training Colleges may be set down as five.

The Students at present in training in these Colleges are distributed thus: Edinburgh, 83; Glasgow, 83.

The course of training extends over two years, and none are admitted as Students except those who have passed an Entrance Examination, conducted by the Scotch Education Department.

The male Students have also to undergo an examination in Latin.

The Students do not enter until they are eighteen years of age at least and are thus sufficiently advanced to make rapid progress under the direction and tuition of the Masters.

Among the subjects of instruction, the principles and practice of teaching have a prominent place assigned to them. The lectures of the rectors on methods of instruction and school-organisation are exemplified in the Elementary Schools, which form an integral part of the Training Colleges. In these Schools 2,100 children, from the age of four to fifteen, are in regular attendance.

Bursaries of the average value of 20*l.* per annum, in addition to free education, are given to all the male Students; a considerable number of Bursaries, of the average value of 9*l.*, are given to female Students. A fee of 3*l.* for education is exacted from female Students.

These Bursaries, as well as all other expenditure connected with the Training Colleges (including the Practising Schools), amounting in all to about 18,000*l.* a year, are paid by the Education Committee.

The Bursaries are now thrown open to all young persons, whether they have been Pupil Teachers or not, who are prepared to accept the instruction, and submit to the discipline of the School. Candidates who have not

been Pupil Teachers must be above eighteen years of age on 1st January, and send a certificate of their age.

From among those returned by the Privy Council as having passed the examination successfully, not fewer than forty male candidates will be selected by the Committee for admission to each Training College, and will receive (during the pleasure of the Committee) a bursary which will amount to 20*l.* The education is free to all those admitted.

All Students are required to pay annually 2*l.* each as a contribution to the Book Fund of the Training Colleges, in return for which all the books they require will be given to them by the Committee. This payment must be made by all, whether the books are taken or not.

*General Secretary and Superintendent.*—Professor Laurie, A.M., F.R.S.E.

## EDINBURGH TRAINING COLLEGE,

JOHNSTON TERRACE.

For Male and Female Students.

*Rector.*—The Rev. James Currie, M.A., LL.D.

---

## CHURCH OF SCOTLAND TRAINING COLLEGE, GLASGOW.

This College was established in 1837. 200 Students, 100 males and 100 females, are educated, as prescribed in the syllabus issued by the Scotch Education Department, and pupils are admitted at the age of eighteen; 50 Students as boarders. There are Bursaries of 25*l.*, 23*l.*, 15*l.*, and 12*l.*, tenable for two years. Examinations are held at Christmas. The practising Schools are attended by about 1,000 pupils.

*Principal.*—David Ross, M.A., B.Sc.

Assisted by eight Lecturers and Assistants.

---

## ABERDEEN TRAINING COLLEGE,

GEORGE STREET.

For Female Students only.

*Rector.*—Joseph Ogilvie, M.A.

---

## FREE CHURCH TRAINING COLLEGE,

MORAY HOUSE, EDINBURGH.

This College was established in 1843. Has no endowment. About 200 Students, male and female, are trained for teaching, paying 3 guineas a session, and provides elementary education for about 800 Scholars; very few free, the remainder pay 16s. to 30s. per ann. each. Latin, Greek, French, German, Mathematics, are charged for additional. There are Scholarships varying from 15*l.* to 24*l.* per ann. for Students tenable for 2 years. Vacations, 6 weeks. Pupils are admitted from five years of age and upwards, after passing an examination before the school authorities.

*Rector.*—Maurice Paterson, B.A.

*Head Master of School.*—Gilbert Graham.

Assisted by five Lecturers and ten other Teachers.

## SPECIAL TRAINING INSTITUTIONS.

Of these there are four, without reckoning those in the Principality at Bangor for 60 male students, and Swansea for 55 young women. The College at Bangor has always been under independent management, and been supported by its own constituency, though necessarily conducted on the parent Society's principles. It is prospering, and sending out 30 teachers annually. The College at Swansea ceased to be under the direct management of the Central Committee in January, 1876, at the commencement of its fifth year of existence. The premises are taken on lease, with the option of purchase at a fixed price within seven years, with a view to their being put in trust for the purposes of a locally managed Training College as long as the Society's principles are kept intact, the property to revert to the parent Society in case of their violation.

The four Colleges are the institutions at the Borough Road, Stockwell, and Darlington, which are connected with the Education Department, and the Kindergarten College at Stockwell, which receives no help from, and is in no sense under the control of, the Committee of Council.

## HOMERTON CONGREGATIONAL COLLEGE,

HOMERTON, E.

This College was founded in 1843, and provides training and maintenance for 50 Students who wish to become teachers in Public Elementary Schools, and who pay 10*l.* 10s. for the course of two years.

*Principal.*—E. Liddell.

## WESLEYAN TRAINING COLLEGE,

HORSEFERRY ROAD, WESTMINSTER.

For training Schoolmasters only.

This College was founded in 1851, and the education is in accordance with the syllabus or male Training Colleges issued by the Education Department. About 135 Students attend; the age for admittance is over eighteen.

Candidates who succeed in passing the Government Examination are called Queen's Scholars; from among these the Committee will select Students, who will be admitted to residence in the College on payment of an entrance fee of 8*l*. On these terms board, lodging, tuition, medical attendance, and an allowance for washing, are provided for two years. Necessary books and stationery, Students must themselves purchase; the cost will be from 20*s*. to 30*s*. per annum. They must also provide their own clothes and travelling expenses.

### *Exhibitions.*

No entrance fee will be charged to a candidate who obtains a place in No 1 or No. 2 upon the Scholarship Class List for England; and only one half the entrance fee will be charged to a candidate obtaining a place upon that list from No. 3 down to No. 10, inclusive.

If any vacancies remain in the College after admitting Queen's Scholars the Committee will consider applications for admission by special payment.

Vacations of six or seven weeks are given at Midsummer and Christmas.

*Principal.*—Rev. J. H. Rigg, D.D.

*Head Master.*—W. Sugden, B.A.

*Secretary.*—Rev. G. O. Bate.

## FINSBURY TRAINING COLLEGE,

THE SCHOOLS, COWPER STREET, CITY ROAD, E.C.

This College has been established to provide a sound practical training for those who intend to become masters in middle and higher schools. Amongst the promoters are the Earl of Morley, Lord Reay, the Dean of Westminster, Rev. W. Rogers, and others.

*Principal.*—H. Courthorpe Bowen, M.A.

## ROMAN CATHOLIC TRAINING COLLEGE,

BROOK GREEN, HAMMERSMITH, W.

This College was founded in 1854, and is intended to meet the requirements of the Privy Council Office for certificates of merit. About 70 Students attend, and are admitted at the age of eighteen, by passing the Queen's Scholarship Examination.

The examinations take place for admission in July, and in December for certificates. The Vacations are six weeks at Midsummer, and four weeks at Christmas.

*Master.*—The Rev. T. Graham, D.D., B.A., London.

And five assistant Masters.

## SCHOOLS FOR OUR DEAF AND DUMB.

## INTRODUCTORY REMARKS.

It is an error to suppose that the persons who are usually called "Deaf and Dumb" are naturally less intelligent than others. Those to whom this term is applied, have either been born deaf, or have, in infancy, through sickness or accident, lost the power of hearing. Although the vocal organs in most cases are perfect, they cannot be developed or trained in the ordinary way, and unless articulation be taught by artificial means, dumbness ensues.

The teaching of this afflicted class of persons was not generally attempted until comparatively modern times. We find the earliest successful efforts of intelligent men to perform a task which the wisdom of antiquity had looked upon as impossible were considered either as miracles or "scientific curiosities." It was not until the year 1760 that the zeal and philanthropy of a great and good man in Paris, the Abbé de l'Epée, aroused public attention to the necessities of the deaf and dumb, and the possibility of educating them. About the same time Samuel Heinicke in Germany practically demonstrated the possibility of teaching the same class generally by the system since called the oral method. The Institution, the name of which heads the list on p. 666, was founded by some benevolent gentlemen in 1792, for the benefit of the indigent deaf and dumb in this country, and has continued its sphere of usefulness to the present day. It was placed in the first instance under the management of Dr. Watson, a nephew of Mr. Thomas Braidwood, a gentleman who had carried on successfully a private school for the deaf and dumb in Edinburgh for some years previously, and which was the first in Britain.

According to the census of 1871, there were about 20,000 deaf mutes in the United Kingdom, a number which happily showed a decrease upon the returns of the former census. A considerable proportion receive no education, or only a scanty one, the means at the disposal of the charities which care for this branch of education not allowing them to make a full provision for the wants of all. The attention of Parliament is now being called to this subject, and as those high in social position have lately paid much attention to the deaf, it is hoped that the usefulness of the above and other similar institutions may be very greatly increased.

The Public Schools for the Deaf and Dumb are situated in the following towns, besides London and Margate, viz., Brighton, Exeter, Bristol, Birmingham, Liverpool, Manchester, Doncaster, Newcastle-on-Tyne, Swansea, Hull, Bath, Edinburgh, Llandaff, Glasgow, Dublin, and Belfast. The age at which children are received varies from four to sixteen years. Most of the pupils at these schools are on the foundation, but at some of them private pupils of the middle and higher classes are received, to whom the cost of education ranges from 25*l.* and upwards per annum.

A "Conference of Head Masters of Institutions and of other Workers for the Education of the Deaf and Dumb" was held in London in 1877, under the auspices of the Social Science Association. Mr. Richard Elliott, the Head Master of the Margate Branch, and also of the London Institution, was the promoter of this highly successful gathering, and acted as its Honorary Secretary. The Report is very interesting to those who desire to know the opinions of men qualified by long experience to speak with authority as to systems and methods of instruction.

There are three systems of instructing the deaf and dumb, viz., (1) the French, in which instruction is carried on by the agency of signs and the finger alphabet, without reference to speech; (2) the German or oral method, in which the finger alphabet is ignored, and instruction mainly conducted through the recognition of visible forms of speech on the lips of the teacher; and (3) the Combined, which, while taking a sober estimate of the capacities of the deaf mute, seeks to give him all the benefits which can be derived from both systems. The London Asylum has been conducted professedly upon the latter method, but is now experimenting on the oral system.

It may here be remarked that an extreme form of the German method, that technically called the "*purest*" form of the system, has lately been energetically pushed into prominence through the exertions of several enthusiastic gentlemen of high social position and the patronage of the leading journal. But its claims to be the system best suited to the needs of the deaf were severely criticised at the above-named Conference, and were allowed only by a small minority of those present. Most of the British Institutions, which have hitherto followed the French method, are now inclining towards the Combined. A course of lessons on articulation and lip reading has been drawn up by Mr. Richard Elliott, the Head Master of the Institutions for the Deaf and Dumb in London and Margate; the Council of which Society have decided upon publishing them, and it is considered that these books will be of immense help to teachers in schools for the deaf and dumb all over the kingdom.

A church for the Deaf and Dumb was opened in 1873, in Oxford Street, London, the foundation-stone of which had been laid, with a becoming ceremonial, by His Royal Highness the Prince of Wales, who on that occasion said: "By no class of our fellow-creatures, afflicted under the inscrutable dispensations of the Almighty, will the consolations of religion be more gratefully received than by those who will hereafter be assembled to have the great truths of the Gospel communicated to them within these walls." The Chaplain appointed was the Rev. Samuel Smith, a gentleman who had long zealously laboured for this afflicted class, and who has justly merited, and gained, their highest esteem. By the great facility with which he expounds the Scriptures in the finger and sign language, he has brought the blessings of religious instruction and consolation home to all. Lectures of the most instructive character are given weekly in the schoolroom of this church, and the Chaplain rapidly and clearly interprets the Lecturer's words, and the evident appreciation observable in the countenances of this "silent audience" is an undoubted proof of the amusement and instruction afforded to them.

As the late Rev. Samuel Smith, who was ordained on Trinity Sunday, 1860, by the late Archbishop of Canterbury (then Bishop of London), was the first clergyman of the Church of England specially destined for the ministry among the deaf and dumb in England, the author considers it a fitting duty to enter a slight but special record of this interesting event in the history of the deaf and dumb, followed as it has since been by the ordination of three other clergymen, two in London, and one in Manchester, and other nominations will doubtless continue to be made. The Reverend S. Smith also held the office of Secretary to the Royal Association in aid of the Deaf and Dumb, referred to more fully in another page; and at the annual meeting of this association in 1878, the Right Honourable Lord Richard Grosvenor, M.P., in the chair, Mr. Smith's eminent services were

explained in detail by G. L. Phipps Eyre, Esq., and in appreciation of which a testimonial in the form of a purse containing nearly 300 guineas was presented to him, accompanied by an illuminated address.

As before alluded to, until within the past forty years, the deaf mutes of the metropolis were practically without any organised system of education ; but now, thanks to the philanthropy of a few earnest men, not only is their mental improvement provided for, but rival societies compete for the honour of instructing them. At a recent congress held at Milan, the oral system was declared to be better suited for the education of the deaf and dumb than any other yet invented. Acting on that recommendation, the Asylum in the Old Kent Road, whose head-quarters are now at Margate, is about to subject the principle to an exhaustive test, and to offer facilities for the accommodation of an increased number of pupils under a fresh arrangement of teachers. London alone contains not fewer than two thousand deaf mutes, of whom, probably, two-thirds are sufferers from birth, while the remainder owe their affliction principally to the results of scarlet-fever, and to disturbance of the nervous system through fright while young. The late Reverend Samuel Smith, the Reverend Charles Rhind, and others have all laboured assiduously to improve the condition of these poor people, and now we hear of a deaf and dumb debating society, a drama performed by deaf mutes in the sign language, and of accomplished and successful painters and sculptors who can neither speak by word of mouth nor hear what is said to them. Without entering upon the vexed question of the value of our system above all others, we may, nevertheless, wish success to this as to every attempt of unselfish and benevolent men to brighten the hard lot of those unhappy creatures who, otherwise in the full possession of their faculties, are denied the inestimable blessings of sound and speech.

The chief Institution in the Kingdom is The Deaf and Dumb Institution, Old Kent Road, London, and at Margate (now the head-quarters) ; and the following are the names of the Head Masters of the principal Schools, with the number of pupils in each.

In the Old Kent Road and Margate Institution, deaf and dumb children are now received at the early age of seven, instead of eight and a half years, and the children are at once placed in classes conducted upon the pure oral system.

# ROYAL ASSOCIATION IN AID OF THE DEAF AND DUMB,

SAINT SAVIOUR'S, OXFORD STREET.

*Patron.*—Her Majesty the Queen.

*President.*—The Lord Bishop of London.

This Association was founded in 1841, and reorganised in 1854.

The object of this Society is to promote the spiritual and temporal welfare of the Deaf and Dumb, 1,800 of whom reside in London :—

1. By providing Special Services and Lectures, conducted in the finger and sign language, the only effective mode of publicly addressing the Deaf and Dumb, and providing them with religious and secular instruction after leaving school.
2. By visiting, instructing, and consoling the sick.
3. By placing the Deaf and Dumb in employment.
4. By assisting them in sickness and distress.

On the occasion of H.R.H. the Prince of Wales laying the first stone of St. Saviour's Church, he made an eloquent appeal on behalf of this afflicted class, and the Bishop of London, in a letter to the Chaplain and Secretary, said : "I have had many opportunities of observing the excellent work which your Association is doing among the Deaf and Dumb in London, and I hope that it may receive in my diocese the support it deserves."

Annual Subscriptions are received by the undersigned, and donors of 10*l.* 10*s.* and upwards are life members.

*Treasurer.*—J. T. Boileau, Major-General.

*Chaplain.*—Rev. Charles Rhind.

*Secretary.*—A. Bather, Esq.

## NATIONAL ASSOCIATION FOR THE EDUCATION OF DEAF AND DUMB CHILDREN OF THE POOR IN IRELAND, CLAREMONT, NEAR GLASNEVIN, DUBLIN.

*Office :* 8, Dawson Street.

This Institution was founded in 1816.

Subscribers of 10*s.*, or collectors of 1*l.* per annum are members ; a donor of 10 guineas, or a collector of 20*l.* in one year, and an executor paying 50*l.* legacy, become life members, and have three votes on each vacancy at all elections of indigent boarder pupils.

Donors of 50*l.* are guardians with five votes, and donors of 200*l.* have twenty-four votes, or may elect and have one poor pupil always in the establishment.

UPPER CLASSES.

## PRIVATE SCHOOL FOR DEAF CHILDREN.

89, HOLLAND ROAD, KENSINGTON, LONDON, W.

At this School resident Deaf Pupils, both Boys and Girls, are received from four years of age and upwards, and are instructed on the German system—viz., by ordinary spoken language, *without* signs, and the pupils study all the branches of a sound English education. The elder Pupils receive personal instruction in religion from the Vicar of the Church, and the younger Pupils are instructed in Kindergarten work. The School year is divided into three terms similar to the Public Schools, and visitors are received on Fridays from 2 to 4 p.m.

*Principal.*—Miss Hull.

THE TRAINING OF TEACHERS,

THE ELMS, CASTLEBAR HILL, EALING, W.

This Institution was founded in 1877 by B. St. John Ackers, Esq., the present Honorary Secretary, and it was established to promote the teaching

of the deaf on the "German system." It also provides for the training of Teachers, Governesses, and Relations of the Deaf, so as to make them thoroughly acquainted with this system both in theory and practice. The School is conducted according to the principles and formularies of the Church of England. A sound English education is given to the pupils by means of articulation, lip reading, reading, and writing. Signs and the manual alphabet are rigidly excluded.

### THE TRAINING COLLEGE.

The College is established for the training of Teachers, Governesses, and Relations of the Deaf. The College will be wholly undenominational. Only Female Students will be admitted as residents. The Students are of three Classes :—In-Students, First Class, Second Class, Out-Students. Certificates will be granted to Students who have completed one year's course, and passed a satisfactory examination in the principles and application of the "German" system. The Fees for tuition are as follows :—In-Students (First Class), 30*l.* per annum ; Second Class, free. Out-Students, 45*l.* per Annum. Fees for board and lodging of in-Students, 50*l.* per annum (for a separate bedroom, 25*l.* extra).

*Chairman of Committee.*—Major-Gen. F. C. Cotton, R.E., C.S.I.

*Treasurer.*—Sir John Lubbock, Bart., M.P.

*Honorary Secretary.*—B. St. John Ackers, Esq.

*Aural Surgeon.*—W. B. Dalby, Esq.

*Principal.*—Arthur A. Kinsey, Esq.

*Secretary.*—Dr. David Buxton.

### INTERNATIONAL CONGRESS IN 1883.

At the International Congress held at Brussels on the education of the deaf, one of the resolutions adopted was that under the pure oral system the classes should consist of six or eight pupils in the earlier stages, and should not exceed twelve in the higher classes. One speaker said that by the pure oral system a teacher could add to the number of pupils as time went on, but by the sign system he must reduce the number as time went on. The suggestion of "mutual teaching"—*i.e.*, the deaf teaching each other—was discarded altogether. As regards industrial instruction, it appeared that the different circumstances of different countries had much to do with the question, but it was generally considered that, in the foreign institutions at any rate, industrial occupation should be combined with school teaching; that workshops should be provided in the larger institutions, where adequate accommodation and appliances could be obtained; and that in the smaller institutions the pupils should be taught suitable handicrafts outside, but still in connection with, their school. The resolutions adopted were few, as the subjects proved, on discussion, to be more local than international. The most remarkable feature of the Congress was that, after the lapse of three years, and in a more widely representative gathering, the decision of the Congress held at Milan in 1880 in favour of the pure oral system, was accepted and acquiesced in as final, and thus practically confirmed, with perfect unanimity.

## CONTINENTAL EDUCATION.

*In the Appendix, Prospectuses will be found of excellent Private Schools for Boys, and Young Ladies, in France, Germany, Belgium, and Switzerland.*

THE subject of Continental Education has become, of late years, a most important question to English parents, therefore the few brief and critical suggestions offered in these pages may not be considered inopportune.

The so-called system of "International Education" which has recently been brought so prominently before the public by one or two principals of private middle-class schools in England, through the medium of extensive advertising in the columns of our principal newspapers, is misleading to English parents, and unproductive of educational results as regards the acquisition of modern languages. Boys are certainly transferred to the Continent for a limited time, under the personal escort of the English school principal; but in most cases it is only to enter some cheap private school which is, so to speak, affiliated to the establishment in England; it does not, however, appear how the education of the boys left in England, and who are not ready for this "*International*" transplanting, is carried on during the period the principals are *escorting* the Anglo-foreign element of their establishments to their respective destinations. However this may be, it is self-evident that this constant draughting of large numbers of English boys, re-uniting abroad, can scarcely be conducive to a rapid acquisition of the modern languages, as we shall presently show; for by this system it becomes practically and simply the transference of an English school *pro tem* to continental soil. We shall therefore endeavour to point out that for a pupil, especially one intended for commercial pursuits, it is advisable for him to entirely complete his English education before taking his year's finishing educational course at a continental school, and our aim will be to indicate to parents what schools or private tutors would best meet the requirements of a pupil for that limited period of study, and many of our remarks may be equally applied to a continental education for young ladies.

In considering the question from this standpoint, we will assume the youth to be sixteen years of age, with just a year allowed him for acquiring the modern languages; the number of boys who go earlier, and stay longer is comparatively so few that they may be left out of the question. The few may have time to reside in more than one country, but, in the majority of cases, parents have to choose a school either in France, Germany, Switzerland, or Belgium, and it is of the highest importance that the year abroad should not be spent in a small country town; for it is not merely the language of a country which a boy should learn, but its customs, manners, and its national institutions should be carefully studied, and this can only be acquired by the pupil being permitted to visit museums, picture galleries, concerts of a high classical order, and witnessing, on the stage, the great works of the French and German dramatists, which, however, should have been previously studied at home, under the careful tuition of a competent tutor. These are a few points deserving serious consideration, but which are more fre-

quently entirely overlooked by educators. A Frenchman or a German who has lived in England sufficiently long to have become almost naturalized, possesses high recommendations as a teacher, for he combines the powers of an Englishman with those of the foreigner, thereby forming a connecting link between the thought and life of England and that of his own country. Scholars of that order are, however, only to be found at our Universities or at the great Public Schools of England; for the ordinary foreign masters at our private and endowed schools are, as a rule, men who come to this country merely for the purpose of acquiring the English language—birds of passage, so to speak—who have, generally speaking, no aptitude for teaching, and who from want of sympathy with their pupils, or from inexperience of English school life, are singularly unfitted to maintain the necessary discipline among English boys. On the other hand, an Englishman who has studied German in Germany, and French in France, understands the difficulties of these languages, in their idioms, grammar, and pronunciation, far better than Frenchmen or Germans, as he has had to overcome them himself; and by his greater influence over boys, can enforce that attention and obedience quite beyond the powers of a foreigner. If our English Universities would establish annual scholarships, enabling graduates to spend at least two years on the Continent, an entirely new era of modern-language education would be created in England, and an efficient staff of foreign (English) masters would soon be available for our English schools; then the modern languages would be thoroughly taught without the necessity of residence on the Continent; but until that time arrives, there is no alternative but to select a school either in Germany, France, Switzerland, or Belgium; and we now revert to the selection of the town. The year abroad should not be spent wholly in the schoolroom; a boy should have every chance given him, under proper supervision, of seeing and judging for himself, and of adding to the knowledge of books that which comes from personal observation. These advantages are not so available, as we have previously remarked, in a small country town, and it is from this point of view that we venture to regard the time as likely to prove profitable or otherwise to an English boy.

With respect to pronunciation, we would remark that, as regards German, the old prejudice which exists in England in favour of an Hanoverian accent is an entire fallacy. Surely it must be idle to speak so highly of an accent which the Germans themselves scarcely recognise or are even aware of. It is not the accent of a particular province, but the "national pronunciation" of the educated, as distinguished from the uneducated classes, which every teacher should try to impart. If called upon to say where the best and purest German is spoken, we should have to decide in favour of the north and west. In the northern and western provinces, where the lower classes have a dialect of their own (the low German), the high German is kept perfectly pure, the children of the poor learning it at school more or less as a foreign language; but where this low German dialect does not exist, as in Bavaria, Suabia, and to a certain extent in Saxony, where, in other words, both the educated and the uneducated speak one and the same language, it is but natural that the high German should become greatly corrupted. The only system of "International Education" at present carried on in England, which is productive of real educational results, is that in connection with a few private establishments conducted by natives of France and Germany,

or by English Tutors and Ladies who, through long residence in those countries, have acquired a thorough knowledge, colloquially and grammatically, of both languages. A few such establishments are known to the author of this work, and in one or two instances a French and a German native act as Principal and Vice-Principal respectively in the same College.

### I. CHOICE OF SCHOOLS.

With regard to the choice of a school, English parents are often misled into sending their sons to cheap private establishments in France, Germany, and other countries, which are said to be in union with equally second-grade private schools in England, and they do this under the idea that they are combining economy with good education. This is assuredly a mistake, for France and Germany are anything but cheap countries to reside in. In consequence of the late Franco-German war, living is in many respects more expensive than in England; so that superior education is incompatible with low terms. The principals of the cheap schools are compensated in two ways for the lowness of their fees: firstly, by the numbers of English boys whom they attract; and secondly, by the length of time these boys are required to stay with them; hence it follows that an English boy at such a school is hearing his own language spoken continually, and his acquisition of German or French is proportionately small; he is consequently compelled to remain two years or more on the Continent, thereby losing at least one year which could be more profitably occupied in England; for as in Germany especially, native boys are rarely sent to these private schools, therefore the opportunities of an English boy meeting with German companions are few and far between; and as he has but little intercourse with German families, and sees nothing of German home life, he consequently returns to England knowing something of the German language perhaps, but entirely ignorant of the country. Nor is it to be passed over lightly, that in such cheap schools it is impossible to get competent masters to stay any length of time; and nothing, in our opinion, is more prejudicial to the course of education than the constant change of masters.

### II. FRENCH AND GERMAN PUBLIC SCHOOLS.

There are many English parents who prefer to reside in a German or French town, and for their children to attend as day-scholars at one of the public schools. This plan, though at first sight very attractive, is open to serious objections; for the course of instruction in these schools—and we allude more especially to Germany—is laid down for native boys; and an English boy of sixteen will be quite unable to follow it, except he enters one of the lowest forms, and as he would then have to sit and study in the same class with native boys of ten or eleven years of age, six months will at least be lost before he is capable of even following the regular course of instruction; and naturally masters will not trouble themselves much about the progress of a boy who is so imperfectly acquainted with that language which is the medium of instruction; and the pupil, being unable to understand the teacher's explanations, will get discouraged, and much valuable time will thereby be wasted. To derive any real benefit from attending a public school, the English pupil should enter at the age of ten, and remain at least six years, so that he might go through the whole course of instruction laid down for native boys; and even then the

results would not be entirely satisfactory ; for the boy, although having passed through a training, high indeed, and well fitted for a future career in France or Germany, would necessarily have missed that English education which would have fitted him far better for the sphere he would, in all probability, be called upon to fill in England or its dependencies.

### III. THE SELECTION OF A SCHOOL OR A PRIVATE FAMILY.

An English parent should either send his sons to a Continental school of known educational standing, or to a Tutor, who receives only three or four pupils into his family circle. The comforts of a home, and the daily social intercourse with the family, contribute much to that progress in acquiring modern languages, which is the sole object of residing on the Continent ; but with regard to this latter course, the great drawback is the expense. In the first place, it is almost impossible to board with a respectable family for less than 80*l.* a year ; and if the Tutor, or family, with whom the pupil resides is unable to give him a systematic course of instruction, he must have recourse to private lessons from other Tutors, and this supplemental expense would be at least three shillings an hour ; one lesson per day would alone amount to nearly 50*l.* a year. The one course that appears to deserve special mention is for the pupil to place himself under a German or French Professor who teaches English, French, and German, at a Public School,\* or Government College,† or Lycée. We will take the case of such a Tutor ; as a rule, he is married, and, generally speaking, only receives three or four English boys ; his official position is a guarantee of his educational qualifications enabling him to remove all difficulties met with by his pupils in their studies through the medium of English. As he must have mastered that language and its literature critically, his pupils could likewise keep up their English course under his care ; and he is equally qualified to make a judicious selection of lectures at which they might attend daily as soon as they are able to follow a more advanced course of instruction.

### IV. AGE WHEN A BOY SHOULD BE SENT ABROAD.

We must not lose sight of the fact that the English boy who is sent to the Continent to acquire French and German will, in all probability, pass his future life in England, and therefore he should finish his English education entirely ; for it should be national, not international and cosmopolitan. The idea of "International Education" was first started in France. An English company some few years ago established an "International College" in London, and others followed in France and Germany. The idea was to place a boy for two years in the London College, then to send him for the same period to the sister College in France, and finishing his education with two years in the College in Germany. The curriculum of studies pursued in England, through English, was to be continued in France, through French, and in Germany, through the German language. This "International College" did not succeed, but the "International" system of education has of late years been largely promulgated in the educational columns of our newspapers, and seems to be at present in active operation, and is apparently remunerative, but we

† Professor La Serre, Membre de Plusieurs Sociétés Savantes, 10, Avenue Kléber, Arc-de-Triomphe, Champs Elysées, Paris.

fear it is an unsuccessful scheme as regards any educational advantage to the pupil. English boys leave in large draughts under the escort of an English schoolmaster, and it is intended they should stay six months or a year in a private establishment at Amiens, Dieppe, Boulogne, or Paris, and afterwards proceed for the same length of time to Bonn or Heidelberg. The disadvantages of this system are numerous, and lie not only in the change of school, and in the certainty of the English boys forming an exclusive colony wherever they go, but also as regards the age at which they leave England. No boy, as we have before stated, should be sent to the Continent before he is sixteen; he has by that time had an education, the basis of which is English, and on the other hand he is old enough to profit by a residence abroad, which could hardly be the case if he left at an earlier age. Let a boy know his mother-tongue thoroughly, and learn to appreciate its literature before he is asked to devote his whole time to the literature of France and Germany. If the pupil is intended for a mercantile career, sixteen will be practically the latest time for his leaving England, as under ordinary circumstances he would be expected to enter business pursuits at seventeen; and in any case it is quite possible for a boy of sixteen, with fair abilities, to acquire good French and German in the year allotted him, provided the tuition is careful and systematic.

#### V.—SCHOOLS AND PRIVATE TUTORS IN BELGIUM AND SWITZERLAND.

Schools in these countries, many of a very high educational order, and conducted by natives, are readily met with, where English students are prepared for our various competitive examinations, and where pupils may acquire a perfect knowledge of the French and German languages, with the advantage of keeping up their English studies. Several English Clergymen and retired Officers of the Army, and University men have recently taken up their residence in Switzerland for the purpose of preparing militia officers and other candidates for our Army Examinations, so much importance being now attached to a colloquial knowledge of modern languages, and the advantages thus attainable will meet an acknowledged want (see page 1145). A movement in this direction has also been made by some of our best Army Tutors in England, who are opening branch establishments on the Continent, or becoming affiliated with well-known Continental Institutions, so that a temporary residence on the Continent will form part of the educational course of preparation for the Army.

The author of this work has issued a pamphlet on the subject of Continental Education, which is intended for gratuitous circulation, and as it contains the prospectuses, printed *in extenso*, of many of the most select and best conducted schools for boys and young ladies in France, Germany, Belgium, and Switzerland, the information therein given cannot fail to be of considerable value to parents and guardians, from its trustworthy character. This pamphlet will be sent by post (postage, 3d.), on application to him at Berners Chambers, Berners Street, London, W., or care of Simpkin, Marshall, and Co., Stationers' Hall Court, E.C., London.

## ADDITIONAL LIST OF INTERMEDIATE SCHOOLS AND COLLEGES FOR BOYS IN IRELAND.

[The list of Schools for Girls is given in Volume II., and all Schools marked with a \* will be found fully described in Part VIII. of this work in topographical order.]

The following list contains the names of Irish institutions at which boys are instructed in those branches of general knowledge now taken as included in the term "Intermediate Education." Some Schools established since the passing of the Act have assumed the name of "Intermediate," and this has given rise to the incorrect notion that, as in the case of Schools under the National Board, and classes in connexion with the Science and Art Department, there must be some process by which a School may "become connected with" or "placed under" the Intermediate Education Board. The Act, however, does not suggest any such process, and the rules of the Board contain no provision of this kind. All Schools satisfying the conditions of the Act are entitled to Results Fees upon Pupils who have passed the Examination, and fulfilled the requirements as to attendance. Christian Brothers' Schools and ordinary National Schools are not included.

NOTE.—A classified list of the Royal Schools, Diocesan Schools, Erasmus Smith's Schools, Roman Catholic Colleges and Schools, and Incorporated Society and other Intermediate Schools will be found at pages 636, 637, 638 and 639.

## NOTE.

THE schools administered under the Endowed Schools Act are classified as "First Grade," "Second Grade," and "Third Grade," and are framed in accordance with schemes passed under the Endowed Schools Acts 1869, 1873, 1874, and 1879.

The Commissioners explain their principles of classification as follows :—

"The distinction between the various grades of schools depends generally upon the character of the education prescribed in the scheme, the rate of fee payable, and the age at which the scholars leave the school."

"FIRST GRADE :—A school in which a complete classical or an advanced modern education is given, with a minimum fee of about £10 a year, and a leaving age of 19, would be termed a school of the first grade.

"SECOND GRADE :—A school of the second grade would be one in which the main object of teaching would not be so completely classical, in which the minimum fee would be about £5 a year, the leaving age 17.

"THIRD GRADE :—A school of the third grade would be one in which little or no classics are taught, where the minimum fee would be about £3 a year, and the leaving age 15."

## TO THE READER.

THE compilation of the preceding and following sections of this volume has been a tedious, and frequently a troublesome task, involving many months of careful labour and diligent research, indeed, to obtain the necessary facts, and to arrange them in the classified order, and in the abbreviated form, in which they are here set forth, has been an undertaking surrounded by no ordinary difficulties, only those persons can appreciate this fully who have been engaged in a similar labour. These obstacles have caused the unusual delay which has occurred in passing the book through the press, for in many cases repeated applications have been made at the "fountain heads" without any result, and the author has therefore been compelled to insert the names only of existing establishments in an "Addendum," having utterly failed in obtaining the necessary data for a more comprehensive classification. This is the chief apology he offers to many patient subscribers for the tardiness in the appearance of this book; and as the leading object has been to give, as far as the nature of the work would allow, the most copious and accurate information on all the salient points connected with every leading educational establishment in the United Kingdom, it would have been most unwise to have unduly hurried on the work, as, in addition to giving a history of existing Institutions, it has also been his aim to make the book a complete compendium of practical information upon all subjects connected with education and examination in operation at the present day, and as all the information has been collated from original sources, it may be strictly relied upon for general accuracy; but naturally in a work of this kind, treating of so vast a number of schools, many important points have necessarily been but briefly alluded to.

It was the original intention to issue a book of about 500 pages; the work has however grown, during the compilation, into a volume of 1,400 pages of closely printed matter, and this feature has added to the obstacles in bringing it out at an earlier date. It may, however, be assumed that the advantages thus obtained will dispel much of the disappointment so openly and naturally expressed by many, at what appeared to them unreasonable delay.

It is advisable that readers should peruse the "Reference Notes" on the next page to facilitate their inquiries respecting the Endowed and Private Schools; and it may be well to inform those Principals whose establishments are not properly classified in this volume, that, if a prospectus is sent to the author, their Schools will be inserted in the next edition in a more uniform and comprehensive manner.

## INTRODUCTORY REMARKS AND REFERENCE NOTES.

1. In this section of the work the Schools are arranged in *topographical* and *alphabetical* order, and, as a double reference, a perfect index is given at the end of the book of the names of all the Head Masters and others, and the place of residence of each person. The alphabetical classification of schools, according to the towns or villages in which they are situated, will be found convenient for the purpose of speedy reference, and the separate index already referred to of the names of Head Masters, with the town or place specified, will be especially useful to those who, in only remembering the name of a Head Master, may have forgotten the locality or name of the school, and *vice versâ*.

2. Should the address of the school only be remembered, it can be as readily found by reference to the body of the work under its classified *locale*. All schools within the London Postal District are given among the London Schools, and they will be found under their respective districts, with the name of the suburb or the name of the street as a heading. Places such as S. Leonard's, S. David's, S. Anstell, etc., will appear under the letter *S*, in their regular position in the body of the work.

3. Schools which are examined officially by the Universities of Oxford and Cambridge are marked with two stars, thus (\*\*).

See particulars of the Oxford and Cambridge Schools Examination Board, page 531.

4. Schools marked thus (†) are not Endowed Schools, but merely private establishments, the Proprietors giving them the name of "Grammar Schools," as a distinctive title.

5. It was impracticable in a work of this character to insert in every instance a detailed account of the whole course of studies pursued at each school, the author has however endeavoured to give a general outline of the most important heads of information, and in many cases has inserted the returns taken from his two works, Vols. I. and II., on the Oxford and Cambridge Local Examinations, entitled "The Oxford and Cambridge Local Examination Record" (price 2s. 6d.), which gives the number of pupils passed by certain schools at these examinations; these results are from the year 1858 (the date of their foundation) to 1873, and he will endeavour to give the returns in a future edition of this book, taken from the tables which will shortly appear in Volume III. of the above-mentioned work, bringing down the results to 1883, being the whole time these examinations have been in operation.

6. Schools sending candidates for these examinations are marked with one star, thus (\*), and it is well known that such examinations were instituted to supply a common test of attainments both for pupils at Public Schools and for those privately educated.

7. The particulars of those schools marked thus (†) are inserted precisely as they appeared in the last edition, no further information or notice of any alteration having been received.

8. At the end of the book will be found the *addenda* containing a supplemental list of schools, particulars of which have not yet been received for classification in this volume, also the *Corrigenda* and several Appendices containing classified advertisements.

**ABERYSTWYTH, ARDWYN SCHOOL** (*North Parade*). Pupils are prepared for Matriculation at the Universities, for the Scholarship Examination at the University College of Wales, for the Oxford and Cambridge Local Examinations, for the Medical and Law Preliminary Examinations, as well as for commercial pursuits. The school year consists of 3 terms, with vacations of about a month at Christmas, a fortnight at Easter, and six weeks in summer, from about the 24th of July. Terms, from 40 to 45 guineas per annum. Principal, the Rev. Llewelyn Edwards, M.A., Lincoln College, Oxford, assisted by competent Masters.

**\*\* ABINGDON** (*Berks*), **ABINGDON SCHOOL** (*1st Grade*). Founded 1563, by John Roysse, Citizen and Mercer of London, and rebuilt on a new site 1870. Endowment, about 580*l.* per annum. The administration of this foundation passes this year, under a new scheme, into the hands of a new governing body. Thomas Tesdale, the first scholar admitted into the school, and his nephew, William Bennet, were great benefactors: Tesdale endowed the ushership and Bennet established scholarships in the school. Tesdale's munificence also combined with Wightwick's aid to found Pembroke College, Oxford, that the scholars of Abingdon School might enjoy the benefits of the neighbouring University. Under the University Bill of 1854 the school still has 5 valuable Scholarships at that college. There are 12 governors, 2 *ex officio*, 6 representative, and 4 co-optative. The *ex officio* Governors are the Mayor and Recorder of Abingdon; of the representative Governors, 2 are appointed by the Town Council, 2 by the Master and Governors of the local Hospital of Christ, 2 by an electing body consisting of the Master of Pembroke College, Oxford, the Camden Professor of Ancient History and the Savilian Professor of Geometry in Oxford University. The 4 co-optative Governors are named in the scheme—Colonel Loyd Lindsay, M.P., Archdeacon Pott, Mr. J. S. Bowles, and Mr. J. T. Morland. At present there are about 75 boys, who are scholars, foundationers, private pupils, and boarders respectively. The aim of the school is to give an education at once economical and in harmony with modern requirements. The school has a senior and junior department, and is divided into Classical and Modern sides; the former prepares for the University, and Examinations where a knowledge of Greek is required; the latter for the Services and mercantile life. No boy may remain in the junior school after the age of 15 years. There is an entrance Examination. The instruction in the junior department comprises the usual English subjects, with Latin and one Modern Language; and in the senior department the same subjects, with the addition of Greek, advanced instruction in Mathematics, Natural Science, Modern Languages, and English Literature. The tuition fee varies with the department, and it is to be fixed within certain limits by the Governors, but it is not to exceed in any case 16*l.* per annum, nor the boarding fee 60*l.* The school-year has 3 terms. There are 12 Scholarships tenable in the school, and 5 Roysse Scholarships annually of 50*l.* at Pembroke College, Oxford, tenable for 5 years, with rooms. Preparation for the Oxford and Cambridge Locals. Head Master, the Rev. W. H. Cam, M.A., Scholar of New College, Oxford, and 4 resident assistant Masters, besides several visiting Masters.

**ABINGDON, THE ARMY COLLEGE.** The College is situated on the Thames, close to the Town of Abingdon, six miles from Oxford, and

within five minutes' walk of the Abingdon Station, Great Western Railway. Exclusively for preparing Militia Subalterns for the Military Competitive Examinations and Officers of the Army for Promotion Examinations. Work being carried on all through the year, Students are admitted at any time. Fees—for a term of 12 Weeks, 60*l.*; 1 month, 22*l.*; 1 week, 6*l.* Under the direction of Lt.-Colonel C. F. Colville, Graduate of the Staff College, and formerly Major of Brigade, Belfast District, and Captain J. Preston, 3rd Berks Regiment, assisted by Captain Stewart, late Royal Artillery, and Captain Festing, late 20th Regiment, resident.

ABINGDON, MILITARY COLLEGE, NORTHCOURT HOUSE. This College is entirely devoted to the subjects required for the preliminary and further Examinations, and in order to obtain the best results in Civil and Military study the two departments are kept quite distinct. The number of admissions are limited so as to ensure the requisite individual instruction of each student. Fees: 55*l.* per term of 3 months; by the month, 20*l.* No extras. Principal, J. L. Hasleham, M.A., assisted by a staff of able tutors.

ABTHORPE (*Northampton*). An elementary school under Government inspection. Founded by Jane Leeson in 1646. The Master must be the Vicar of Abthorpe. Endowment, 8*l.* Head Master, the Rev. S. C. Skeels, M.A.

\* † ACCRINGTON (*Lancashire*) ACADEMY. Pupils in this school are prepared for the University Local Examinations and commercial life. Principal, J. N. Haywood.

ACKWORTH (*Yorkshire, near Pontefract*), FLOUNDERS' INSTITUTE. Established 1848. Endowment, about 1350*l.* Pupils, who are all members of the Society of Friends, are instructed in Classics, Mathematics, Natural Philosophy, Chemistry, and Modern Languages. Special preparation for the B.A. degree of the University of London. Vacations, 11 weeks in the year. Principal, William Scarnell Lean, M.A. (Lond.), and a resident tutor.

ACKWORTH SCHOOL. Founded 1778, and primarily established for the education of children who are members of the Society of Friends; 170 boys receive a sound English education, and are also taught Classics, Mathematics, and Modern Languages. Terms for board and education, from 15*l.* to 40*l.* per annum, according to the circumstances of parents. 120 girls also attend for instruction. Superintendent, F. Andrews, B.A., assisted by a staff of Masters.

\* ADMASTON SPA (*Wellington, Salop*), THE COLLEGE. A well-known boarding school, in which pupils are prepared for the Universities, the Public Schools, the Oxford and Cambridge Middle-Class (in both of which they have been distinguished), the Legal Preliminary and Pharmaceutical Examinations, also for professional, commercial, or agricultural pursuits. The year is divided into 2 terms of 20 weeks each, and the holidays are at Midsummer and Christmas. Terms for boarders, from 35 to 40 guineas per annum.

*Note.*—This school is now closed: the premises were not fully adapted for scholastic purposes.

ALDENHAM (*Herts*), GRAMMAR SCHOOL (*1st Grade*). Founded 1597, by Richard Platt, alderman and brewer, of London. Participates, under a new scheme issued in 1875, with two Lower Schools and Almshouses in endowments of 4,000*l.* per annum. The subjects of instruction are: English, Latin, and Greek; French and German; Mathematics; History and Geography; Natural Science; Drawing; Vocal Music. The terms are 63*l.* a year for Boarders, viz.:—Board and washing, 16*l.*, Tuition, 5*l.*, a term. In cases of absence for a Term, the Tuition Fee and one-third of the Boarding Fee are chargeable. Extra tuition: Music, 3*l.* 3*s.*; Drawing, 1*l.* 8*s.* Sons of Freemen of the Brewers' company, made free before May 15th, 1875, are admitted at a total cost of 34*l.* a year, for Board, Washing, and Tuition. There are Ten Junior Platt Scholarships, of the average value of Thirty Pounds, tenable for three years, open to all Boys under fourteen years of age. Four Scholarships of the above value are awarded annually in July. The scheme has arranged for Ten Senior Platt Scholarships of the annual value of 60*l.*, tenable during residence at the School, open for competition to Boys already in the School, and between the ages of Fifteen and Seventeen. These will be awarded as the Income of the Trust allows. The sum of 450*l.* a year is placed at the disposal of the Governing Body for the formation of not less than three Exhibitions yearly, tenable at the Universities or other place of liberal election, or for the purpose of fitting the holder for some profession. The School has the advantages of a Swimming Bath, Cricket and Football Grounds, and a covered Recreation Ground. Candidates for admission must be ten years of age, of good health, of good character, and able to pass an Entrance Examination in Reading, Writing, the first four rules of Arithmetic, and the outlines of the Geography of England. BRIGHTON, BRIGHTON COLLEGE. This College, built by Sir Gilbert Scott, was established by a body of subscribers, in the year 1847, with the object of providing for boys a thorough, liberal, and practical education, in conformity with the principles of the Established Church. Its system as regards discipline and organisation is that usual in Public Schools. Pupils are prepared for the Universities, the Professions, the Army, or Commercial life. English Literature, Modern Languages, and Mathematics are taught in every part of the School, and in the highest classes on the modern side form the principal part of the curriculum. Science forms a part of the regular class-work throughout the School, with the exception of the highest Classical Form, in which it is usually omitted. The College stands in its own grounds of upwards of 10 acres, and is situated in the healthiest part of Brighton, immediately under the Downs. It is intended to accommodate 300 boys. The buildings were erected in 1847, and comprise Lecture Hall, Class Rooms, Library, Chapel, Dining Hall, Principal's House, Carpenter's Shop and Laboratory. There is an excellent Playground of about 6 acres, with a Cricket Pavilion, Fives Courts, etc. The College includes an Upper School, a Middle School, and a Junior Department. In the Junior Department, for boys of from 9 to 13 years of age, the course of study is so arranged as to fit them for entrance into either of the Senior Divisions. No boy can remain at the College after he is 18, except by special permission of the Council. The Upper and Middle School embrace two Divisions. In the Classical Division the subjects taught are Divinity, Classics, Mathematics, English Literature and History, French, and Science. German is optional, but there is no extra charge. In the Modern Division the subjects taught are the same, except that German is substituted for Greek, and more time is assigned to French and Science. There is a Special Army Class, in which

preparation is made for Sandhurst, Woolwich, Cooper's Hill, and the Indian Civil Service. The course of instruction enables boys to go up for their examination direct from the College. There are regular classes in Science, the subjects varying from time to time. There is a good Laboratory, in which practical instruction in Chemistry is given to any boy who is sufficiently advanced to profit by it. There is a well-fitted Carpenter's shop, including lathe, etc., superintended by a qualified instructor. Training in Choral Singing is given to all boys who have sufficient musical ability to sing in the School Choir, and special facilities are afforded for learning Vocal and Instrumental Music. The College year is divided into three terms. The vacations consist of three weeks at Easter, seven weeks from about the end of July, and five weeks at Christmas. The School hours are as follows:—Chapel at 9; work from 9.15 to 11.15 and 11.30 to 12.30 every week-day morning, and from 3 to 5 on four afternoons of the week. The College is examined in July by Examiners appointed by the Council, and at Christmas by the Staff of Masters. Prizes are given twice in the year, at Midsummer and Christmas. Boys who wish to obtain the "Leaving Certificates" granted by the Oxford and Cambridge Schools Examination Board are examined by the Board in July. The Proprietary consists of about 300 shares, which entitle their possessor to nominate one pupil for each share. The Council have power to nominate pupils at an extra charge. At present an extra fee of 1*l.* a term is charged for such Council nominations. The College Fees for tuition are as follows:—Under 13 years of age, 24*l.* per annum, clergymen's sons, 18*l.* 15*s.*; from 13 to 15, 27*l.*, clergymen's sons, 21*l.* 15*s.*; above 15, 31*l.* 10*s.*, clergymen's sons, 26*l.* 5*s.* The extra fees are optional with the exception of those marked †:—Music (piano or singing), 2*l.* 2*s.* per term; Drawing (freehand or painting), 1*l.* 8*s.*; Drawing (geometrical), 2*l.* 2*s.*; Carpentry, 10*s.* 6*d.*; Chemistry (practical work for examination), 10*s.* 6*d.*; †Drilling, 5*s.*; †Gymnastics, 15*s.* Boarders are received by the following:—The Rev. the Principal, the College; the Rev. G. J. Le Maistre, 125, Eastern Road; C. G. Allum, Esq., 131, Eastern Road; C. B. Woollcombe, Esq., Junior house for boys under 13, 1, Arlington Villas. In the three Senior houses the charge is 63*l.* per annum for board; in the Junior house 57*l.* 10*s.* Day boys from a distance can have dinner provided for them on all whole School days, at the rate of 4*l.* per term for four dinners in the week. There are Special Prizes, and the following Scholarships are open to competition, as specified in each case: Scholarships tenable at the College—Three of 60*l.* per annum and three of 40*l.* per annum, tenable only in the boarding houses; three of 20*l.* per annum, tenable by day boys or boarders. The examination for these, in which allowance for age is made, is held yearly in July; candidates, whether in the College or not, must be under 15 years of age on the 1*st* of July, with the exception of boys already holding Scholarships in the school, who are allowed to compete until they attain the age of 17. All the above are tenable for one year only. This scheme is liable to alteration. Scholarships tenable at the Universities: (1) The late Thomas Attree, Esq., founded this Scholarship in the year 1863 in memory of his son; it is of the value of 60*l.* a year, tenable for two years at the University of Cambridge, open to competition every second year to boys who shall have been not less than three years at the College. (2) Mrs. Soames and her family founded three Scholarships in the year 1873, in memory of the late William Aldwin Soames, Esq., one

of the most influential founders of the College; they are of the value of 50*l.* a year each, tenable for three years at Oxford or Cambridge, open to competition, one every year, to boys who shall have been not less than three years at the College. All the Scholarships tenable at the Universities will be awarded after the examination in July. Principal, Rev. Thomas Hayes Belcher, M.A., Queen's College, Oxford. Vice-Principal, Rev. Joseph Newton, M.A., St. John's College, Cambridge, and 15 assistant Masters. Secretary, F. W. Madden, Esq., M.R.A.S.

\* **BRIGHTON, THE WESTERN COLLEGE.** Established 1835. The course of education pursued in this school is one which has been attended with the most successful results, especially in preparing pupils for the Universities, the Competitive Civil Service, the Military Examinations, and the Public Schools, in all of which the pupils have been highly distinguished. **EDINBURGH, CIRCUS PLACE SCHOOL.** This school was opened on the 3rd of January, 1826, having been established by eminent educationists of that day, to provide a thorough elementary education for the children of the higher classes. "To institute a school for teaching English, Writing, Arithmetic, Geography, etc.; to initiate the young persons attending it into a free and vigorous exercise of their understanding on everything that they might be called on to read or to perform; to impart to them as much substantial information as possible on all the subjects that were level to their capacity; to form in them habits of diligent application, as well as to cherish in them the love of knowledge; and to

instil into their minds, both by separate lessons, and through the medium of their ordinary exercises, the genuine principles of Christianity and moral virtue." In addition to the ordinary English branches, the course now embraces Latin or French, and extends over a period of 5 years. The communication of useful and interesting knowledge, especially in connection with such branches as Geography and History, forms an important feature in the teaching of all the classes, and every means is employed to stimulate the youthful mind to its acquisition. There is in connection with the school a large and well-selected Library, to which the pupils have access. The fees for tuition range from 4 to 8 guineas per annum. Rectors, Thomas M'Lachlan and W. M. Begbie, with a staff of assistant Masters.

GLASGOW (*Scotland*), ANDERSON'S UNIVERSITY. John Anderson, M.A., F.R.S., the founder of Anderson's University, was born at Roseneath, in Dumbartonshire, in the year 1726, and died on 13th January, 1796, bequeathing by his will, dated 7th May, 1795, the whole of his property, with a few trifling exceptions, to the public, for the good of mankind and the improvement of science, in an institution to be denominated "Anderson's University," and to be managed by 81 Trustees. According to the design of the founder, there were to be 4 Colleges, for Arts, Medicine, Law, and Theology, besides an Elementary School or Academy. Each College was to consist of 9 Professors, the senior of whom was to be President or Dean; and the whole, when acting in one body, were to be called the "Faculty" of the College. The funds, however, were quite inadequate to carry out the plan, the value of the whole, including library and apparatus, being under 1,000*l.* Since the establishment of the Institution, it has been greatly extended, so as to render it more in accordance with the intentions of the founder. It now consists of a complete Medical School. This is taught by an efficient staff of Professors; and from the superior character of the tuition, and its cheapness, a large body of students are attracted from all parts of the kingdom.—Foundations and Bursaries. James Yeats, Esq., left to the University 40*l.* per annum. In 1861, John Freeland, Esq., left the sum of 7,500*l.* In addition to the above, Mr. Freeland in 1871 made a gift to the University of 5,000*l.* In 1866, William Euing, Esq., settled in trust the sum of 3,000*l.* Mr. Euing subsequently made a gift to the University of the Model Schools adjoining the University buildings. Mr. Euing died on the 12th of May, 1874.

By his will he bequeathed his whole Musical Library to the University, along with 1,000*l.* for the purpose of building a fire-proof room for its accommodation, and of paying a librarian to take charge of it, besides a sum of 200*l.* to print a catalogue. Mr. Euing also left the University the sum of 6,000*l.* for general purposes, and 150*l.*, the interest of which is to be applied in providing prizes in connection with the Chair of Music instituted by him. In the year 1870, James Young, Esq., settled in trust the sum of 10,500*l.* for the purpose of establishing a Chair of Technical Chemistry. In connection with this Chair several Bursaries have been presented, of 50*l.* per annum each, tenable for 3 years. In the Medical School the fees for all the Lectures and Hospital Practice required for a diploma amount to 40*l.*, which sum includes perpetual attendance on the Medical and Surgical Practice and Clinical Lectures at the Royal Infirmary or General Hospital, which contains 600 beds. There are also popular evening Lectures and Classes.—Professors. Faculty of Arts : Physics or Natural Philosophy, George Forbes, M.A., F.R.S.E. ; Mathematics, Alexander Laing, LL.D. ; Chemistry, William Dittmar, F.R.S.E. ; Applied Mechanics, W. T. Rowden, B.Sc., A.R.S.M. (London). Faculty of Medicine : Chemistry, William Dittmar, F.R.S.E. ; Institutes of Medicine, D. C. M-Vail, M.B. ; Practice of Medicine, M. Charteris, M.D. ; Anatomy, A. M. Buchanan, M.A., M.D. ; Surgery, James Dunlop, M.D. ; Midwifery, J. G. Wilson, M.D., F.R.S.E. ; Materia Medica, James Morton, M.D. ; Medical Jurisprudence, Alexander Lindsay, M.D. ; Ophthalmic Medicine, J. R. Wolfe, M.D., F.R.C.S.E. (Lecturer).

GLASGOW, MECHANICS' INSTITUTION, 38, BATH STREET. Provides Lectures and Evening Classes at moderate fees to about 1,000 students. Examinations are held in May by Local Board of the Science and Art Department. Robert R. Tatlock, F.R.S.E., F.C.S., and 20 other Lecturers and Teachers.

GLASGOW, GLASGOW ACADEMY. Established 1846. To qualify pupils for University or Business. The course of instruction includes Latin, Greek, French, German, English, Mathematics, Physics, Chemistry, Drawing. Number of pupils, 600. Fees vary from 4*l.* to 16*l.* 16*s.* a year for tuition. Scholars admitted by Head Master at any age. Examinations in June by Examiners appointed by the board of Directors. Vacations in summer, all July and August, and a fortnight at Christmas. Rector, D. Morrison, M.A., LL.D., with 20 other assistant Masters.

GLASGOW, HIGH SCHOOL. Founded in 12th century. The High School of Glasgow is one of the Eleven Higher Class Public Schools originally constituted under the Education (Scotland) Act, 1872. curriculum embraces all branches of a liberal education. 250 pupils are in attendance, and the instruction is carried on by a Principal with 16 assistant Masters and 1 Governess for the Elementary School. The fees range from 5*l.* to 14*l.* per annum for the first year, and are increased each year the student remains until they reach 22*l.* per annum in the fifth year. The quarter days are September 1st, November 16th, February 1st, and April 19th. Head Master, Edward A. Sonnenschein, M.A. (late Scholar of University College, Oxford).

GLASGOW, BERKELEY TERRACE SCHOOL (formerly CHESHAM PLACE SCHOOL). Boys are trained either for Business or for the Universities, while young ladies receive a sound and solid education. The fees range from 10*s.* 6*d.* to 2*l.* 2*s.* per session. Head Master, William S. Jamieson, B.Sc., F.E.I.S., member of the Glasgow University Council.

GLENALMOND (*Perthshire*), TRINITY COLLEGE. This institution was founded in 1841, and presented, until very recently, the double character of a Theological College in connection with the Scottish Episcopal Church, and a Public School for boys. The Theological Department is now permanently settled in Edinburgh. The Public School department at Trinity College is intended to furnish an education of the best kind as a preparation for the Universities, the Military Colleges, the Civil Service, or for general or professional life. Boys are admitted at any age between 9 and 19. The whole school is divided into three different sets of classes. The highest education is given. In the "Modern Side" special attention is given to Physical Science. The additional subjects taught in the Modern Side, as such, comprise Modern History, English Literature and Composition (including Letter-writing), extra work in French and German, Book-keeping, and Physical Science: to the last-mentioned a minimum space of 5 hours a week is devoted. The Science subjects are (1) Physical Geography, Meteorology, and Elementary Astronomy, (2) Mechanics, (3) Heat, (4) Electricity and Magnetism. Of these, 2 are taken in hand at one time, and a boy who has been 3 years in the Modern Side will have gone through the entire course in that time. Boys are sent up to compete for Woolwich and Sandhurst direct from the school. Special Woolwich and Sandhurst classes do private work with masters out of School hours. There is a Cadet Rifle Corps (Highland) composed of members of the College. Annual terms: 90 and 80 guineas, according to age; for sons of Scottish clergy (Episcopal), 50*l.* and 40*l.* Vacations, 14 weeks. The school year is thus divided: Lent term, January 20 to April 15; Trinity term, May 10 to July 31; Michaelmas term, September 20 to December 20. These dates are only approximate. IRTON (*Cumberland*). GRAMMAR SCHOOL. Founded 1716, by Henry Caddy. Endowment, 10*l.* per annum, is now supplied in aid of a National School in the same parish.

IRVINE (*Scotland*). IRVINE ACADEMY. The academy of the royal burgh of Irvine, established under Royal Charter, in 1814, has since that date been conducted in the interests of the higher education, and on the passing of the Education Act of 1872, its character as a higher class Public School was finally secured. The school is a mixed one, being attended by both boys and girls, though these are taught in separate divisions, and have special benches assigned them. By age and general progress the pupils fall naturally into three divisions—a Senior, a Middle, and a Junior. Upon these divisions the scale of fees is based. Again, from a grouping of the subjects taught—viz., 1. Linguistic (Classics, French, and German) ; 2. Mathematical (Geometry, Algebra, Arithmetic, Physical Science) ; and 3. The subjects usually known as English—there arise other 3 divisions, fairly independent of age, and determined mainly by subject. Quarterly written Examinations, conducted by means of printed papers, are held on all the subjects of the curriculum. Boarders are received by Mr. Monie, English Master, at his residence, Seaview Cottage, Irvine. The fees for day-scholars range from 14*s.* to 7*l.* per annum. Rector, Zachary M. H. Ross, M.A., and 5 assistant Masters.

\* LEATHERHEAD, ST. JOHN'S FOUNDATION SCHOOL. OFFICES, 1A, S. HELEN'S PLACE, BISHOPSGATE, LONDON, E.C. Founded 1852, Entirely supported by voluntary contributions. This school was instituted in 1852, for providing a free education and maintenance for the sons of the poorer clergy of the Church of England, resident in England, Wales, or Ireland. It occupies a department of charity peculiarly its own. There are institutions, indeed, for the cheap education of the sons of the clergy, but none where they are educated free while their fathers are alive. S. John's Foundation School is a practical assertion of two principles; first, that it is desirable to help the living clergyman, too often inadequately paid, to bear the charges of his family; and secondly, that the offer of an education at a cheap rate to those who can afford nothing is scarcely all that the poor labourers in Christ's vineyard are entitled to hope for from their more wealthy brethren. Present number of Foundationers, 127. 9 First-class Certificates have been gained by pupils at the University

Locals since 1874. Head Master, Rev. A. F. Ratty, M.A., late Scholar and Prizeman, Pembroke College, Cambridge, with 5 resident assistant Masters, and 3 non-resident.

### SCHOOL BOARD FOR LONDON.

*Offices :* VICTORIA EMBANKMENT, W.C.

For list of members, see page 675. According to the last official report issued in October 1883, it appears that at that time the Board had under its control 329 schools; of those, 270 were permanent schools, 31 were held in temporary buildings, and 28 had been transferred to the Board. These schools gave accommodation to 295,746 children. These figures showed an increase upon the last report of 8 schools, and 15,471 places. There were at Easter last in the Metropolis 700,894 children requiring elementary education. The Voluntary Schools at midsummer provided for 262,238, and the Board 295,746, so that the entire provision at that time amounted to 557,984. When the Board have completed all their projected schools, they will have secured provision for 647,724 children. Meantime it was a solid gain that London had 295,725 efficient school places more than it had 12 years ago, the increase being 117·7 per cent. Sites and buildings together have averaged 16*l.* 8*s.* 3*d.* per child. In all these cases the provisions of the schools as well as the actual sites and buildings have been approved by the Education Department. As to attendance, the number on the roll for the half-year ending midsummer last was 311,695, and the average daily attendance 255,833, or 82·0 per cent.; the percentage of the voluntary schools, at the same time, being 80·1. The attendance was secured in various ways. The Board makes its masters and mistresses responsible for the regularity of their pupils. At the same time the number of apathetic and neglectful parents is such as to render most necessary the labours of their 11 superintendents and 247 visitors who formed the machinery for applying compulsion. The Board awards prizes to children. As to the teaching staff, at Lady-day the Board had in their schools 4,087 adult teachers, of whom 544 held first-class certificates, and 2,367 second-class. There were also 1,107 pupil teachers, and 389 candidates. Bible instruction, with simple religious exercises, formed a part of the daily programme. Needlework and cookery and domestic economy were also taught in the girls' schools; while lectures had been given to scholars on temperance and thrift. Children had been encouraged to deposit in the Post-office Savings Bank, and libraries had been established. The Board educates 191 deaf and dumb and 105 blind children, and 515 children are provided for in industrial schools and training ships. The chief heads of expenditure for the current year are estimated as follows:—For school maintenance, a sum of 492,576*l.* 5*s.*; for the compulsory bye-laws, 33,539*l.* 12*s.*; for industrial schools and training-ships, 35,565*l.* 15*s.* Their sources of income arose from Government grants earned by scholars, amounting in the last year to 187,477*l.* 15*s.* 8*d.* But their chief dependence was on the rate, which stands at 6·86*d.* Chairman of the Board, Edward North Buxton, Esq.; Clerk of the Board, George Hector Croad, B.A.

Head Master, Henry Pinder, B.A., London, and 10 assistant Masters.

SPITALFIELDS, JEWS' FREE SCHOOL. This large and flourishing school was founded in 1817, and now accommodates 1,600 boys and 1,100 girls. The family of the Rothschilds took much interest in the young institution, and contributed munificently to its maintenance and advancement. The former President was the late Sir Anthony de Rothschild, who is now succeeded by his nephew, Sir N. M. de Rothschild. The Committee abandoned the monitorial system, and originated the tutorial system, and also devised means for training their own teachers, as done for general schools in Normal Colleges. Besides the pupils in attendance as stated above, about 100 teachers are being taught and trained in the establishment. Moses Angel is the Head Master, and continues, after 40 years of service, to direct this the largest educational establishment in the British dominions. The late Alfred Davis was the Treasurer 35 years ago, and he devoted no less than 60,000*l*. to promote the advancement of the school.

STEPNEY, DEMPSEY STREET, JUBILEE STREET, THE EAST LONDON UNION FOR ADVANCED EDUCATION. This Institution is in connection with the Government Department of Science and Art, and the City and Guilds of London Institute. President, H.R.H. the Duke of Albany. Chairman of Committee, Rev. J. F. Kitto, M.A. Treasurer, Sir Edmund Hay Currie, with 4 Trustees and 45 Vice-Presidents. The origin of the East London Union for Advanced Education (Evening Classes) will be clearly explained in the following brief introductory remarks. The object being to raise the whole character of the district intellectually and socially by giving young people opportunities of obtaining better positions in life. The work of the East London Branch of the Society for the Extension of University Teaching, and of the classes which

were formed with the view of acting as feeders to that movement, now ranks among the institutions of general public interest, and as an illustration of the extended usefulness of the "Preparatory University Teaching Classes," we find the "East London Union for Advanced Education" superseding the less ambitious description of the useful educational movement, which, by the labour of Mr. F. H. Parsons, was initiated, and by his perseverance, and the encouragement and assistance of public men in East London, has been promoted, until such satisfactory progress has been made, that the membership of the classes reaches the important number of 3,000, and this, too, by steady and unostentatious work, and now provides evening classes, at which the knowledge of languages, of various branches of science and art, or courses of technical study may be pursued. The objects being:—(a) To maintain in the East of London an Educational centre, where instruction in the higher branches of knowledge—Science, Art, Languages, Technology, and other subjects of general utility—will, for the lowest possible fees, be afforded by Teachers of well-ascertained ability. (b) To officially connect with the Union the various Young Men's Societies and Institutes in the district; and to enlist the co-operation through a wide area of as many as possible who come into relations with young people, such as Ministers of various Denominations, Officers and promoters of Young Men's Societies, Clubs, Institutes, etc.; Teachers of Public Schools, Employers of labour, and influential laymen generally. (c) To provide all necessary apparatus for carrying on the various classes and making them widely known throughout the district. The Subjects embraced in the curriculum being:—Agriculture, Algebra, Arithmetic, Art, Book-keeping, Building Construction, Carpentry, Chemistry, Christian Evidences, Civil Service (Excise, Lower Division, Customs, Boys, Ladies), Divinity, Drawing, Elementary Classes, Elocution, English Grammar, English Composition, Experimental Physics, French, Geology, Geometry, German, Greek, Hebrew, Hygiene, Latin, Machine Construction, Magnetism and Electricity, Mathematics, Matriculation, Mechanics, Mechanical Engineering, Physiography, Physiology, Political Economy, Shorthand, Steam, Violin Class, Vocal Music (Tonic Sol-Fa). Prizes and Certificates are offered to large amounts by the Science and Art Department, the City and Guilds of London Institute, and by the Council of the Union. The fees for Science and Art Subjects are from 3s. to 4s. for the course of 9 months; Commercial and other Subjects from 3s. to 4s. for 3 months, 5s. to 7s. for 6 months; Civil Service Classes 10s. to 12s. 6d. for the course, these being brought within the reach of all possessed with the desire for mental improvement. The Institution is absolutely non-sectarian; it is not to enter into competition with existing agencies of an educational character; but directing its efforts to the higher educational wants of East London, it aims at providing the best teaching power, supplementing its class work by occasional lectures. Class work is, however, the main feature. To testify to his appreciation of the educational work being done, the Duke of Albany has, upon the application of the Chairman of the Committee, consented to become the President. Amongst those to whom the movement is indebted, the following gentlemen may be mentioned:—The Rev. John Fenwick Kitto, M.A., Rector of Stepney, son of the celebrated Dr. Kitto; the Rev. A. J. Ross, B.D., DD., late Vicar of St. Phillip's, Stepney; the Rev. John Kennedy, D.D.; the Rev. Harry Jones, M.A., late Rector of St. George's-in-the-East; to

Edward North Buxton, Esq., Chairman of the London School Board ; to Rev. Dr. McAustane of Hackney ; to Sir Edmund Hay Currie ; the Rev. John Saunders, B.A., of Wycliffe Chapel, E. ; to the Rev. W. P. Insley, M.A., Rector of Bow ; to the Rev. Archibald Brown, of the East London Tabernacle ; the Rev. A. J. Robinson, M.A., Rector of Whitechapel ; the Rev. Septimus Hansard, M.A., Rector of Bethnal Green ; Mr. William George, of Somerset House, and South Hackney ; the Rev. Joseph Fletcher, of Commercial Road Chapel ; Mr. R. M. Gumell ; Mr. A. Griffin, the Hon. Assistant-Secretary. Hon. Secretary, F. H. Parsons, White Horse Lane, E.

\* **COWPER STREET, CITY ROAD, CITY OF LONDON MIDDLE CLASS SCHOOL.** Incorporated under Royal Charter in 1866. The object of the founders of this institution is to provide a liberal and practical education adapted to the needs of that large class of boys who may be expected to leave school at 15 or 16, and to take an active share in the Commercial life of London. The course of instruction includes all those subjects to which parents are accustomed to assign the first importance, because of their immediate and obvious relation to business. It seeks, by the training of the intelligence in Mathematics, in Science, and in Literature, to encourage taste and intellectual aspiration, to develop the faculty of independent thought, and to promote the love of reading and the love of truth. The system of instruction has been confirmed and shaped by experience, and the present condition of the school is one of eminent prosperity and usefulness. Neither Latin nor Greek forms part of the staple of instruction in the school, but some pupils are prepared for the Oxford and Cambridge Locals, and up to 1873, 52 certificates had been gained, 19 in honours. The ages of the

boys range from 12 years in the third form, to a little less than 15 in the sixth form, and the average age at which boys leave the school is 2 years and a half below that at which boys leave the old Public Schools. About 1,150 pupils are in attendance, and the fees are 4 guineas a year. There are several Scholarships and prizes, including the Scholarships of Baroness Rothschild, of the Fishmongers' Company, and of the Skinners' Company, of the value of 50*l.*, and tenable for 4 years. Lady Tite's Scholarship of 20*l.*; Baroness Rothschild's prizes for Modern Languages; the Head Master's prizes of 5*l.*; other prizes are very numerous. Head Master, Dr. Wormell, with a staff of 26 assistant Masters, giving an average of about 45 pupils to each Master.

† CANNON STREET, MERCERS' COMPANY'S SCHOOL, 20, COLLEGE HILL, CANNON STREET. Founded 1542. At this school 150 boys are instructed, and Nominations are given by Master, Wardens, and the Court of Assistants, in order of rotation. No boy is admitted a scholar who, on examination by the Head Master, does not reach a graduated standard of attainment. The annual Capitation Fee of each scholar is 5*l.* 25 of the 150 boys in the school are Foundation scholars, who pay no Capitation Fee. The places of the scholars as they become vacant are filled by a competitive Examination (in which Greek shall not be one of the subjects) open to all such boys under 14 years of age as are in the school. Under the New Scheme there are 9 Exhibitions of 25*l.* a year, tenable for 3 years at any place of higher education. Boys must have entered school under the age of 12 years, and have been 5 years at the school. Head Master, Rev. Douglas L. Scott, M.A., LL.D., with several assistant Masters.

FINSBURY CIRCUS, THE LONDON INSTITUTION. This institution is for the advancement of literature and the diffusion of useful knowledge, and was founded under that title in 1805, and incorporated by Royal Charter in 1807. It maintains a library of 70,000 vols. for reference and circulation (members being allowed to borrow 10 vols.); provides reading rooms well supplied with newspapers, magazines, reviews, and scientific and technical journals; it further promotes the diffusion of useful knowledge by lectures, extending over four winter months, and delivered by the most distinguished lecturers of the day. This is an association of 950 proprietors, in whom are vested the freehold and funded property. The present funded capital amounts to upwards of 37,000*l.* stock; all the buildings of the institution are freehold, and the land-tax is redeemed. Subscribers' tickets, giving personal admission to the advantages of the institution for 1 year from the day of purchase, are issued at 2*l.* 12*s.* 6*d.* or 2*l.* 2*s.*, according as the subscriber wishes or does not wish to attend the lectures. President, Warren de la Rue, Esq., D.C.L., F.R.S.; Treasurer, A. J. Robarts, Esq.; Assistant Librarians, George Parr, Esq., Henry T. Williams, Esq., Frederick A. Cox. Professors: Chemistry, Henry E. Armstrong, Esq., Ph. D., F.R.S., Sec. C.S.; Botany, Robert Bentley, Esq., F.L.S.; Music, John Ella, Esq.; Principal Librarian and Superintendent, J. Macdonald Horsburgh, M.A.; Hon. Sec., Rev. W. Rogers, M.A.

CITY ROAD, FINSBURY COLLEGE, 53A, CITY ROAD. The system of education adopted is that which modern science and experience have shown to be most in accordance with the constitution of the human

mind, and best calculated to strengthen, develope, and rightly direct its faculties. The course of instruction includes English, Mathematics, Drawing, Mapping, Natural Philosophy, and all Science subjects, Vocal Music, French, German, Hebrew, Greek, or Latin. Classes are formed in connection with the Science and Art Department, South Kensington. Terms: from 3*l.* to 6*l.* per annum. Principal, Rev. Thomas Wells Cave, LL.D., assisted by non-resident Masters.

\* TRINITY SQUARE, BREWERS' SCHOOL, OR DAME ALICE OWEN'S SCHOOL, TOWER HILL. Founded by Alderman Hickson, A.D. 1687. The object of the school is to provide a useful and liberal education for the sons of professional men and respectable persons engaged in business in and near London. The number of scholars is limited to 100. 20 of these may be Foundationers, and are educated free (14 belonging to Allhallows-Barking, and 6 to S. John, Wapping), the rest pay 7*l.* 10*s.* per annum, and are admitted as vacancies occur. Instruction in Classics, French, German, Drawing, Mathematics, Chemistry, and Natural Science, etc. Examiners nominated by Brewers' Company. Vacations, 12 weeks. Head Master, the Rev. Herbert Williams, M.A., and 4 assistant Masters. Clerk to the Brewers' Company, W. C. Higgins, Addle Street, Brewers' Hall, Aldermanbury.

SKINNER STREET, BISHOPSGATE UPPER SCHOOL. The schools were originally founded in 1702, but the present extensive buildings in Skinner Street, Bishopsgate, were only erected in 1872. They are capable of accommodating upwards of 1,500 scholars. The school was inaugurated by the Bishop of London, the Lord Mayor, Sheriffs, and Corporation of the city of London, and was opened for instruction on April 8th, 1872. A good Commercial education is given at this school, and the teaching of Science is a special feature, also Latin and French. There are about 170 pupils, who are admitted at the age of 7 and upwards by the Head Master. Fees, 4 guineas a year. The school year is divided into 3 terms. Vacations, 10 weeks. Rector, William Rogers, M.A.; Head Master, Edward W. Moore, M.A., with 6 assistant Masters.

TOTTENHAM, N. See Letter T.

MOORFIELDS, CITY OF LONDON COLLEGE. Patron, Her Most Gracious Majesty the Queen. This College is in connection with "The London Society for the Extension of University Teaching," and in union with the Society of Arts and the Government Department of Science and Art, it was founded in 1848, with the object of forming evening classes for young men. His Royal Highness the Prince of Wales presided at the opening of this College, in their newly-erected buildings, which are handsome in design and commodious in arrangement, in 1883. This institution, in an unpretending way, has been the means of bestowing an incalculable amount of good upon the youth of the City, and its alumni have increased from the half-score of pupils who first attended its classes to the 4,000 students who are now enrolled upon its registers. Classes are set apart for every department of art and science, and special attention is paid to modern languages, from the rugged Dutch to the mellifluous Italian. The new College, the foundation-stone of which was laid last year by Sir John Ellis, then Lord Mayor of London, occupies an excellent position

at the corner of North Street and White Street, within a stone's throw of Moorgate Station. The fees are very moderate. There are numerous Scholarships and Prizes, including the Lubbock Scholarship, of the annual value of 10*l.*; 4 Studentships, of the annual value of 5*l.* 5*s.* each. Instruction is given in the following subjects:—French, German, Italian, Spanish, Latin, Greek, Hebrew, Arithmetic, Geometry, Algebra, Trigonometry, Mensuration, English Language, Political Economy, Chemistry, Magnetism, and Electricity, Geology, Physical Geography, Shorthand, Drawing, Building, Construction, Machine Construction and Engineering, Animal Physiology, Metaphysics, Logic, Theoretical and Applied Mechanics, Law, Vocal Music. The vacation lasts 3 months,—July, August, and September. All Masters are non-resident. Principal, Rev. Richard Whittington, M.A., Trinity College, Cambridge.

† ISLINGTON, LADY OWEN'S SCHOOL, OWEN STREET, ST. JOHN'S STREET ROAD. Founded 1613, by Lady Alice Owen. Reconstituted by a Scheme of the Endowed Schools Commissioners, dated 14th August, 1878. The buildings of this school have now been completed. It is a day-school for 300 boys, open to all boys of good character and of sufficient bodily health, residing with their parents, guardians, or near relations within degrees to be determined by the Governors. The object of the school is to provide a sound, practical, Middle-class Education on moderate terms, viz., 3*l.* per annum, but these fees will probably be raised. The original school and almshouses, founded by Dame Alice Owen in 1609, were situated in John Street Road, between the Old Red Lion Tavern and the Crown and Woolpack. The

story of the origin of the school is as follows : Lady Owen was one day "walking abroad in the fields, attended by her maidservant, when she observed a woman milking, and had a mind to try whether she could milk the cow, which she did, when an arrow was shot through the crown of her hat (then worn very tall), which so startled her that she then declared if she lived to be a lady she would erect something on that spot of ground to commemorate the great mercy shown by the Almighty in that astonishing deliverance." Time passed on until she became a widow, when her servant, who happened to be the one who had been present when the accident occurred, reminded her of her vow. Her answer was that she remembered the affair, and would fulfil the promise. She therefore purchased the Hermitage Estate (being "land from the Welsh Harp to the Turk's Head"), and built thereon almshouses and a free grammar school in 1609. The story continues that the archer was Sir Thomas Owen, who afterwards married the lady. Scholarships, Exhibitions, etc.—Foundation Scholarships: The sum of 300*l.* per annum is available, when the school is in complete operation, for Scholarships tenable in the school. Alice Owen Exhibitions: The sum of 200*l.* is available for Exhibitions of an annual value of not more than 50*l.* each, for the promotion of higher education, tenable by distinguished scholars on leaving the school, who have regularly attended for two years at least. No Scholarship or Exhibition will be tenable for more than four years. Prizes are awarded by the Governors at their Annual Visitation, to the boys most distinguished for proficiency and good conduct. Head Master, James Easterbrook, M.A., Graduate in Honours, University College, London.

ISLINGTON, ENGLEFIELD COLLEGE, 127, ENGLEFIELD ROAD. Established January, 1877. The education is Commercial, and includes French and Latin, Natural Science, Drawing (Freehand, Model, Geometrical, Perspective), and Pianoforte. There are 130 day-pupils, paying 4*l.* 6*s.* and 8 guineas per annum. Music extra. Boys admitted by Principal from 6 years of age and upwards. Pupils examined by College of Preceptors half-yearly. Vacations : 1 week at Easter ; 5 weeks in August ; 4 weeks at Christmas. Principal, Joseph Percy, F.R.G.S., and 4 assistant Masters.

KENTISH TOWN, KENTISH TOWN SCHOOL, PADDOCK LODGE, FORTRESS ROAD. Boys' Public Day School Company Limited, Office, 19, Warwick Street, Cockspur Street, London, S.W. The first school of the Company was opened on the 12th September, 1883. It is proposed to establish schools in various districts upon a similar plan to Public Day Schools for girls, so many of which are in full working order. The object of this Company is to establish, organize, and manage, on a Christian basis, with a conscience clause, self-supporting Public Day Schools, intermediate in grade between the inspected elementary schools and public schools of the highest class. President : The Right Hon. Lord Aberdare, P.C., F.R.S., with 20 Vice-Presidents, and a Council consisting of sixteen members. Secretary, Edward Johnson. The course of instruction is intended to include :—Religious Knowledge, Reading and Recitation, Writing, English Grammar and Composition, Literature, History, Geography, Arithmetic, Algebra, Geometry, Latin, French, German, Elementary Science, Drawing, Singing, Shorthand, Drill or Gymnastics. The parent or guardian of any

scholar may, on giving notice in writing to the Head Master, withdraw such scholar from any lesson or lessons on a religious subject, or from attendance at prayers. No boy under eight years of age is admitted. The school year is divided into three terms of about 14 weeks each; the vacations to be about three weeks at Christmas, two in the Spring, and five in the Summer. The school hours are from 9 a.m. to 12-30 p.m., with a short interval for recreation; and from 2 to 4 p.m. Saturday is a whole holiday. The fees for the ordinary school course are as follows, viz.: for pupils under 10 years of age, 7*l.* 10*s.*; for pupils between 10 and 14 years of age, 9*l.*; for pupils above 14 years of age, 10*l.* 10*s.* per annum. Application for the admission of pupils should be made to the Head Master. Priority of admission is given to the nominees of shareholders. There will be periodical examinations to test the work of the pupils, conducted by Examiners from the Universities of the United Kingdom. A report of each boy's progress and conduct will be sent to his parents or guardians at the end of each term. Head Master. Alfred Allen, B.A., Trinity College, Dublin (late assistant Master at Christ's College, Brecon).

\* **WOOD GREEN, ROYAL MASONIC INSTITUTION FOR BOYS.** Patron, Her Most Gracious Majesty the Queen. President, H. R. H. the Prince of Wales, K. G., etc.—M. W. Grand Master. Vice-Presidents (*ex-officio*), The Right Hon. the Earl of Caernarvon—M. W. Prov. G. M., R. W. Prov.

Grand Master of Somerset; the Right Hon. Lord Skelmersdale, R.W. Dep. G.M., Prov. Grand Master of West Lancashire. Vice-Patrons, The Right Hon. Lord Leigh—Prov. Grand Master of Warwickshire; and others. This excellent institution was founded July 3rd, 1798, with the object of clothing and educating the sons of deceased and indigent ancient Freemasons. A good middle-class education, including French, German, Latin, Science (Chemistry, Magnetism, etc.), to pupils, the sons of indigent Masons; all free, including their board. The age of admission is 8 years, and candidates are elected for admission by votes of Governors and subscribers. Many of the pupils are prepared for the Cambridge Local Examinations, and 42 certificates had been gained by pupils, 16 in honours, up to 1873. The vacations are: 2 weeks at Midsummer; 3 weeks at Christmas, ordinarily. As regards the educational and general position of the school, all who have visited the institution have expressed their entire approval with the general arrangements, and the progress in educational attainments has kept pace with the other improvements. To obviate objections occasionally urged by advocates of different views on the all-important subject of education—to meet fairly the differing talents and acquirements of varying individuals—and to provide suitably for the respective positions which the pupils may be expected to occupy on leaving the institution, the school has been divided into 2 sections—Classical and Commercial. By this means eminence in either department is within the reach of all, according to the extent of intellectual attainments, or to the occupation to which each is destined, or may be expected to fill. The education comprises a sound English Commercial education, with the addition of French and German, and in the upper division the Classics and advanced Mathematics. Drawing, under competent tuition, was introduced in 1869, not so much as an accomplishment, but as a most valuable assistance in after life, many opportunities of employment being open to those possessing a knowledge of this art, which would be denied to them without such qualification; similar considerations have induced the Committee, in conjunction with the Head Master, to determine on the introduction of Vocal and Instrumental Music, and for this purpose a qualified Instructor has been appointed. As a matter of Masonic History it is generally known that in the year 1717 the members of the four Lodges then existing in London, in a regularly convened assembly, constituted and declared themselves to be the “Grand Lodge of Free and Accepted Masons of England,” and from that event may be dated the revival of Freemasonry in the south of England. Considerable prosperity attended the new organization; its progress was for some time most successful in every respect, and the subject of charity at an early date occupied the attention of its rulers. The first mention—the germ, in fact, of the now successful development—of a design to establish some such an institution as this is found in the records of Grand Lodge, January 31st, 1739, the Marquis of Caernarvon, G.M., viz.:—“A scheme was proposed for the placing out Masons’ sons Apprentices, but after long debate the proposal was rejected, as a scheme too extensive for the fund of charity.” The probability is that the question would, ere the lapse of any lengthened period, have again occupied the attention of Grand Lodge, but in this case, as in the cases of other societies established for the highest and noblest purposes, differing views and counsels ere long produced dissensions which, commencing in 1740, resulted in a separation. The two bodies were known by the titles

respectively of "Ancient" and "Modern,"\* and continued to exercise a divided jurisdiction for upwards of half a century. Good, however, frequently comes out of evil, and though there can be no doubt that heart-burnings and jealousies prevented that attention to the great principles upon which the Order is founded, which happily has since been so extensively bestowed, the movements in question "excited the attention of the Fraternity, and also of the public. Lukewarm Brethren became partisans on either side, and Freemasonry reaped the benefit of these misunderstandings by an increase both in numbers and influence. Thus the ranks of both 'Ancient' and 'Modern' were increased, and the funds of benevolence for the widow and orphan augmented from new and unexpected sources; a result which cemented the popularity of the Order. Its beauties and excellencies were placed in a clearer and more prominent point of view, and the public became convinced that though the two hostile parties may differ on some unimportant points of discipline, both were pursuing the same laudable course,—the investigation of science, and the benefit of mankind."† As a practical illustration of the latter object, the "Modern" Brethren—*i.e.*, those who adhered to the Constitution of 1717—established in 1788 the "Cumberland Freemasons' School,"‡ now known as the "Royal Masonic Institution for Girls."§ The history of that institution, so far as the present purpose is concerned, requires no further notice, save a record of its continued and increasing prosperity, on which every Mason has reason to congratulate himself. In 1798, the members of the "Ancient" Fraternity, not to be behindhand with their rivals, established "The Masonic Institution for Clothing and Educating the Sons of Deceased and Indigent Ancient Freemasons,"|| with His Grace the Duke of Atholl, Grand Master of the "Ancient" Grand Lodge, as Patron; the origin of which is thus stated:—"July 3rd, 1798. A meeting took place for the purpose of establishing a Masonic Charity for educating and clothing the sons of indigent Freemasons. A subscription was opened to carry this object into execution, and 6 children were immediately put upon the establishment. Since that period the charity has been gradually approaching to its present flourishing state. Aided by the very liberal contributions of the Masonic Craft in all parts of the world, of the Grand Lodge in particular, the Right Worshipful the Grand Master. His Grace the Duke of Atholl, the several Grand Officers individually, as well as of many others not of the Fraternity, but who have felt proud to assist so laudable an institution, its funds have generally increased, and the establishment has been extended.

---

\* These titles of "Ancient" and "Modern" must not be taken as indicative of comparative date of origin. The seceding body adopted the title of "Ancient," alleging that the body from which they seceded had departed from the old laws and landmarks and had introduced "Modern" innovations into the old working rites and ceremonies, the observance and practice of which they, the "Ancients," were determined to maintain and preserve. The facts stated thus simply and concisely, are sufficient for this sketch,—all allusion to the controverted question as between the rival Grand Lodges in London is studiously avoided.

† Oliver, "Origin of the English Royal Arch," ed. 1867, p. 56.

‡ In the original prospectus described as "a seminary for the maintenance of 15 or more girls, the daughters of indigent Freemasons;" with H. R. H. the Duchess of Cumberland as "Patroness."

§ Previously known as "The Royal Freemasons' School for Female Children."

|| In 1858 the title was altered to "The Royal Masonic Institution for the Sons of Decayed and Deceased Freemasons." In October 1868, to "The Royal Masonic Institution for Boys."

The number of children, who partake of the benefits of this charity, which was originally only 6, has been gradually enlarged; and at the celebration of the jubilee, when all ranks of society joined in joyful commemoration of our gracious Sovereign's long and happy reign, the establishment was increased to 50, that being the number of years during which his Majesty had then held the dominion of these realms. The children admitted on this charity are clothed, and put out to school, in the neighbourhood of their residences, at the expense of the institution, the funds not being yet extensive enough for the erection of a school-house: which object, however, by the aid of future voluntary contributions, the Directors of the establishment hope hereafter to accomplish. The more especially as, at the present period, all classes of subjects are striving who shall be foremost in giving education to the poor of all denominations. The impulse of charity is universal; when, therefore, every other class of the community is distributing with a liberal hand enlightenment and education to the poor, the principles of Masonry demand that Freemasons should not neglect theirs." In the year 1813, all distinction between "Ancient" and "Modern" was swept away, and from that period English Masonry has flourished under one jurisdiction, "The United Grand Lodge of England;" the only rivalry now existing amongst the Brethren being that of doing good, and particularly in using every exertion to render the Masonic educational institutions the boast and pride of the Order, and the admiration of the outer world. The changes that have successively taken place in this institution will be to some extent gathered from the following slight sketch. Every child applying for admission, must (if resident within the cities or suburbs of London or Westminster) personally attend the Committee, and produce a certificate from the Master and Wardens of the Lodge to which his father shall or did belong, certifying that he is or has been a member thereof, the Grand Secretary's Certificate of his being duly registered for 3 years on the Grand Lodge books, together with certificates of his parents' marriage and his own baptism. Where the candidate happens to be fatherless, the matter is left to the discretion of the Committee. A general quarterly meeting of the Governors and Subscribers is held at the Virginia Coffee House, Cornhill, the first Friday in January, April, July, and October, at 6 o'clock in the evening, to receive the reports of the Committee, and to transact such other business as may come before them. The number of pupils provided for in the year—1877—reached 185. The following statement will show the growth of the institution:—1798\* (year of foundation) 6; 1810\* (jubilee year, reign of George III.), 50; 1857† (opening of first building purchased at Wood Green). 70; 1862. 72; 1865 (opening of new building), 80; 1866, 100; 1869, 110; 1872 (April), 112; 1872 (October), 115; 1873, 125; 1874 (January), 139; 1874 (August), 153; 1876 (April), 158; 1877, 166; 1878, 191. There are, in addition to the number 191:

\* In these years, and until 1856, the pupils were clothed, but educated at schools in various districts.

† In this year 25 boys were clothed and maintained and educated in the newly purchased building, the remainder being provided for as before. In 1859, 68 boys were admitted, 2 preferring to receive the advantages of the institution under its original constitution. Since 1862, all who have been elected, with an occasional exception, have received the full benefits of education, clothing, and maintenance in the establishment.

pupils admitted by purchase, 14; pupils admitted by perpetual presentations, 4; pupils admitted by life presentation, 2. Total number after election, April, 1878, 211. The total number of boys who have received the benefits of the institution since its foundation—including those last elected—is 1,380. The large expenditure incurred in the erection substantially and satisfactorily of the new buildings for an increased number of pupils and resident Masters, and to meet the educational requirements of the day, necessitated recourse to a loan, and 10,000*l.* was borrowed on mortgage in 1867. The success attending the special efforts of Brethren in West Yorkshire, East Lancashire, and other provinces in connection with the anniversary festival in March 1869, and of the festival in 1870, under the Presidency of H.R.H. the Prince of Wales, K.G., M.W.P.G.M., enabled the Committee to pay off the mortgage debt, though in effecting this desirable object the liability of a heavy balance on current account with the bankers was incurred, the interest on which continued to press heavily on the resources of the institution until the spring of 1873, when it was entirely removed. Treasurer, George Plucknett, Esq., P.G.D., V.P.; Honorary Surgeon, Wharton P. Hood, Esq., M.D., 65, Upper Berkeley Street, Portman Square. Honorary Dental Surgeon, Peter Matthews, Esq., L.D.S., F.R.M.S., and F.Z.S., 11, Welbeck Street, Cavendish Square. Principal, Edmund S. Croke, B.A., Pembroke College, Cambridge. See also Index to Appendix B.

\* **WESTMINSTER, UNITED WESTMINSTER (ENDOWED) SCHOOLS, (3rd grade), ALEXANDRA STREET, VICTORIA STREET.** Under this general title there are now three schools, provided out of the united endowments of certain old hospital schools in Westminster, viz., Emanuel, St. Margaret's, Emery Hill's, and Palmer's Hospitals. The value of these endowments exceeds 4,500*l.*; much of the property is at present unproductive. These schools rank as middle-class, the education being of a superior character to that of Board or National schools, the pupils receiving a sound English education, with the elements of Latin, French, German, and Mathematics, special attention being paid to Natural Science. The schools thus united include Emanuel Hospital, founded by Lady Dacre in 1594; St. Mar-

garet's Hospital, of the Royal Foundation of Charles I.; Palmer's School, founded in 1650; and Hill's Grammar School, founded by Emery Hill in 1708—all these being reconstituted as one school by the scheme of the Endowed Schools Commissioners, the City authorities having a large share in the administration.

I. EMANUEL BOARDING SCHOOL, which is at present temporarily held in the old buildings of Emanuel Hospital, James' Street, Westminster. By an order in Council, 1873, Emanuel School was separated from Emanuel Hospital, placed under a distinct body of Trustees, and provision made for the erection, in the neighbourhood of London, of a Boarding School for 300 boys, of whom 60 should be "Exhibitioners" under the name of "Dacre Scholars" Emanuel Hospital, having been founded by a Lady Dacre, A.D. 1595. The remainder will be charged 25*l.* per annum for their board and education, etc. The present school contains only the 60 free boys, who form the nucleus of the school about to be erected. The school is kept up to the number of 60 as vacancies occur. The boys are of two classes: (1) Orphans, or otherwise in adversity; (2) Exhibitioners competing from the elementary schools of Westminster and Chelsea. Every necessary is provided except clothing, for which a small terminal charge is made. Head Master: the Rev. J. Maskell, A.K.C., London, Master and Chaplain of Emanuel Hospital; Assistant, J. Francis, C.M., of S. John's College, Battersea. Both resident.

II. PALMER AND HILL'S DAY SCHOOL. III. ST. MARGARET'S TECHNICAL DAY SCHOOL. These two schools are practically the upper and lower divisions of a middle-class day-school for about 600 boys, since they both occupy one site, and are at present under the superintendence of one master. They have been recently erected on land formerly belonging to Emanuel Hospital, in Palace Street, Westminster, and are in many respects model schools of their kind. The fees are 3*l.* in the lower and 4*l.* in the upper division; books, 10*s.* per annum. In each school the arrangements as to the number and the qualifications for free scholarships are similar to those of the Emanuel School. Provision is made for helping deserving boys to the Universities or to other schools, and boys are prepared for the Civil Service, Oxford Local, and other Examinations. Head Master, Robert E. H. Goffin; and thirteen assistant Masters all non-resident. Secretary to the Governors of the United Westminster Schools, C. Spencer Smith, Palace Street, Westminster.

WESTMINSTER, BLUE COAT SCHOOL. This is a free day-school, it was founded in 1688, held in an ancient building in St. James's Street, Victoria Street. It is supported partly by voluntary subscriptions and partly by surplus subscriptions of past years, invested in the funds, and producing about 210*l.* per annum. The education is of a superior character to that of the ordinary free or parochial schools, and vacancies are much sought after. Clothing, in addition to the free education, is awarded to 45 deserving children. Head Master, Mr. Sarsons.

KING'S COLLEGE, STRAND. See page 199, Part III.

KING'S COLLEGE SCHOOL, STRAND. See page 202, Part III.

FLEET STREET, STATIONERS' SCHOOL, BOLT COURT. This school was established by the Stationers' Company in 1858. Sons of Liverymen and Freemen of Company are entitled to priority of admission in the order of their application, as well as to the benefits of the foundation.

The curriculum of studies comprises all the branches of a thoroughly liberal education, including Classics, Modern Languages, and Science. The fees are 7*l.* to 8*l.* per annum. There are various Scholarships and Prizes, viz. :—Edmund Hodgson's Scholarship of 20*l.*, with free education, tenable for 4 years at any University; three Thomas Brown's Scholarships of 20*l.* each; two Charles Knight's Scholarships of 20*l.* each, tenable on the same conditions. It would occupy too much space to give the various prizes in detail. Head Master, H. Chettle, M.A., with a staff of assistant Masters.

GREAT ORMOND STREET, 45, WORKING MEN'S COLLEGE. Founded 1854. Education in Classics, Modern Languages, Mathematics, Physical Science, History, Art, etc. The students are, for the most part, working men; and the teachers are, in general, members of the Universities and of different Professions, or those who have themselves been students in the College. Its purpose is to unite these classes together, by associating them in the common work of teaching and learning. It provides instruction in Latin, Greek, French, Spanish, Italian, German, Mathematics, Physical Science, Art, etc., at the smallest possible cost, to about 300 students (the teaching being almost wholly unpaid), in the subjects with which it most concerns English citizens to be acquainted, and thus tries to place a liberal education within the reach of working men. Students must be above 16 years of age. They must be able to read and write, or must go to the Adult School in the College, paying 2*s.* per month, to qualify themselves for the College classes. Students can join the College at any time, but the regular time of entering the classes is the beginning of the College year—about the middle of October. In some subjects elementary classes are also formed at the beginning of the third term—early in March. The College year consists of 4 regular terms from 8 to 11 weeks each. Vacations: 2 weeks at Christmas; 1 at Easter; and 6 in the autumn. At entrance, each student pays a fee of 1*s.* 6*d.* Each class is entered and paid for separately, at the rate of 1*s.* to 6*s.* each per term, with the exception of the Art Department. Examinations are held in June each year by University Professors appointed by the Council. New rooms have been erected, and special fees are charged according to the class taken by the student in this section. Principal, Sir John Lubbock, M.P., F.R.S., Vice-Principal, C. Crawley, assisted by about 20 Teachers and Lecturers. Secretary, H. R. Jennings. The South London Working Men's College, opened by Professor Huxley, is established on the same plan.

GREAT ORMOND STREET, 45, INTERNATIONAL COLLEGIATE SCHOOL. Established 1870. This establishment is carried on in the extensive buildings of the Working Men's College, and is intended to meet the growing wants of this populous district by providing a system of instruction based on religious principles, at once thorough and economical, uniting the methods of English schools with those of Germany and France. Instruction in Classics, Mathematics, French, German, English, Drawing, etc. Day-pupils only. The school is divided into Senior and Junior departments. Fees: 5 to 15 guineas per annum. Public Examinations annually. Vacations, about 10 weeks. Principal, Rev. J. L. Bere, B.A., and assistant Masters.

GRAY'S INN ROAD, S. BARTHOLOMEW'S GRAMMAR SCHOOL. Esta-

blished 1851. Instruction in Classics, French, Mathematics, and English course, to 70 boys, all day-scholars, at from 4*l.* to 6*l.* per annum. Examinations at College of Preceptors and University Middle Class. Vacations 2½ months. Head Master, W. W. Richardson, and assistant Masters.

GORDON SQUARE, 17 GORDON STREET. A limited number of pupils, either resident or non-resident, prepared for the Army, Control, and Civil Service Examinations. Principal, E. W. John, assisted by visiting Masters.

GARRICK STREET, 19, GARRICK CHAMBERS. Pupils are prepared most successfully for the Indian Civil Service, Indian Engineering College, the Colonial Civil Service, and the superior offices of the English Civil Service. The work is conducted partly by Lecturers, but chiefly by special tuition in small classes. Every facility is afforded for efficient and practical teaching in the various branches of Natural Science. A small Laboratory for Chemistry, and also a Laboratory, with the necessary apparatus, for the department of Electricity and Magnetism. Apart from the Lecture rooms, but immediately joining the Garrick Chambers, a club library has been formed containing 1,000 books of reference in all departments of General Literature, History, and Science. The hours of attendance are from 10 a.m. to 5.30 p.m., subject to a break of 1 hour for luncheon. All pupils are non-resident. Terms: 110*l.* per annum. There are 3 terms in the year, each term averaging 13 weeks. Principal, W. Baptiste Scoones, assisted by a large staff of Professors and visiting Masters.

HOLBORN, 17, BARTLETT'S BUILDINGS. Candidates prepared in all branches of the Natural and Experimental Sciences, for the Examinations at the Universities of London, Cambridge, and Oxford; Indian Civil Service; Engineering College, Cooper's Hill, etc. Principal, Dr. Maybury.

† LEICESTER SQUARE, ARCHBISHOP TENISON'S GRAMMAR SCHOOL (2*nd grade*), CASTLE STREET, LEICESTER SQUARE. Founded 1684. Endowment, about 70*l.* per annum. NOTTINGHAM, UNIVERSITY COLLEGE. The circumstances under which this college has been built is eloquently explained by His Royal Highness the Duke of Albany, who opened the college in 1883, and the educational machinery of Nottingham may now be said to be complete. For the last seven or eight years lecturers from Cambridge have had crowded audiences at Nottingham, Government science classes have also been carried on there with much success, and the town has for a considerable time possessed a free library and a natural history museum. The elements of a prosperous college already existed, and were much valued by the townspeople, it remained only to consolidate them, and to increase the utility of each part by giving them all a home under one roof. The munificent anonymous donation of 10,000*l.* was the first incentive to the creation of this noble institution, which provides a wide range of subjects in all branches of education, the fees for students being so moderate as to meet the educational wants of all classes. At the opening ceremony His Royal Highness delivered the following brief address: he said, "Whether we consider the manner in which this noble building has been founded, or the various objects which it is intended to advance, I think we have reason for very deep satisfaction, very confident hope. First in the work of founding it, came the anonymous donor with 10,000*l.* I do not know

who he may be, but I envy his feelings if he is here to-day to see on what good ground his seed was sown. Then came the helpful energy thrown into the scheme by the University of Cambridge, and especially by a member of that University whose name is well known to all who are interested in the higher education of the country—Professor Stuart. And lastly—and this is the most important fact of all—your wealthy town has herself taken the matter up, and resolved to complete and maintain the great institution in a manner worthy of her wealth and public spirit. I had hardly realized till this morning how many objects your college is meant to serve, and how well it has been fitted for all of them. I admired the free library—an excellent example to towns which have not as yet provided their citizens with that great advantage. I admired, too, the spacious rooms in which you have housed your museum of natural history. This was well worth doing, for the value of a museum depends largely on the way in which the collection is shown. But your great building is above all things a college, a centre for the higher education of the men and women of Nottingham. You will not, I hope, be tempted to let the teaching which you give become too exclusively technical. You will remember how many of your students will need from you not so much that you should help them in their daily work, as that you should teach them to rise above it, that you should open to them wider vistas and make them capable of new joys. But technical teaching is urgently needed too, and I trust that the teaching given in your college will do as much for the other industries of Nottingham as your art school has already done for your designs in lace. And there is another advantage in thorough technical training which should never be overlooked. To learn anything thoroughly teaches us to respect what we learn; it teaches us to delight in our task for its own sake and not for the sake of pay or reward. And the happiness of our lives depends much less on the actual value of the work which we do than on the spirit in which we do it. If a man tries to do the very simplest and humblest work as well as he possibly can, it will be interesting to him, and he will be proud of it. But if he is only thinking of what he can get by his work, then even the highest work will soon become a weariness to him. I trust that your college will send forth many men so trained to do good and honest work that to do work which is bad or dishonest shall be simply impossible to them. Men like these may be proud of their trade, proud of their town; and I do not believe that we become better citizens of the world by being indifferent to the instincts and the honour of our town or of our own nation. I believe that the narrower patriotism is often the best way of leading us to the broader, and that the better citizen a man is of Nottingham the better citizen will he be of England, and that the truest sons of England will make the best citizens of the world. Then it is, when a man has lived for others, has worked for public ends, that the good which he has done is not ‘interred with his bones.’ No; it lives after him, so that, in the words which form the proud motto of your ancient corporation, ‘*Viret post funera virtus.*’”

OXFORD, THE CITY OF OXFORD HIGH SCHOOL FOR BOYS. The foundation stone of this school was laid by H.R.H. the Duke of Albany on April 13th, 1880, and in June 1883 His Royal Highness, attended by H.R.H. the Duchess of Albany, formally opened the school. The buildings are in the Jacobean style—like those of the New University Schools—which is of all styles the most suited for such purposes, and have cost up to the present about 10,000*l*. His Royal Highness said, "I cannot say how much I admire the building." The scheme follows the best precedents set by the Endowed School Commissioners. A principal feature in it is the provision for the ultimate establishment of a considerable number of free scholarships for the benefit of select boys from the public elementary schools of the city. There is an influential governing body. The school is open to all boys residing in Oxford or the neighbourhood, who have attained the age of 8 years, provided they pass a satisfactory entrance examination graduated according to age. Boys are prepared for Business, the Services, the learned Professions, or the Universities, and for special examinations. The arrangements of the school are adapted on the one hand to the Oxford Local Examinations, and on the other to the Certificate Examination of the Oxford and Cambridge Board. There are 3 terms in each year, of an average length of 13 weeks. The fees for boys entering between 8 and 10 years of age, till they are 12 years old, 2*l*. 16*s*; over 10 years, 4*l*. 4*s*. Extra fees for Greek, German, or a second branch of Science, 3*l*. 3*s*. Entrance fee, 1*l*. 1*s*. In the case of boys who do not learn Greek, extra time will be devoted to French. A certain number of free scholars are elected annually in December by competitive examination, partly from boys already in the school, partly from boys under education at the public elementary schools of the city. The school is provided with Exhibitions to the University, to be competed for at the Summer Examination by boys who have been not less than 3 years in the school. Head Master, A. T. Pollard, M.A., of Wadham College, for some time teacher of the Sixth Form at Dulwich College, with 8 assistant Masters.

\* \* OXFORD, MAGDALEN COLLEGE SCHOOL. Founded 1480, by W. Waynflete, Bishop of Winchester. Endowment, not being separate from the college, is not stated. This is a First Grade Classical School. The President and Fellows of Magdalen College have made suitable provision for it, and the regular course of instruction will include the Greek, Latin, French, and German Languages, Mathematics, and English subjects, Divinity, History, Geography, English Grammar, Literature, and Composition, etc. Training for University and the highest Professional life to a fixed number of 130 boys. Terms: day-scholars pay 18*l*. 18*s*.; boarders pay 88*l*. 4*s*. per annum. Midsummer Examination. Upper forms examined by Oxford and Cambridge Schools Examination Board. Vacations: Midsummer, 7 weeks, July 20 to September 9 (about); Christmas, 5 weeks, December 21 to January 24; Easter, about 10 days or a fortnight. Examiners are appointed by the College. Head Master, the Rev. Harman Chaloner Ogle, M.A., Fellow and late Tutor of Magdalen College, and 13 assistant Masters. Visitor, the Lord Bishop of

Winchester, Governor, President, and Fellow of Magdalen College ; School Committee, the President, Vice-President, Dean of Divinity, and Senior Bursar.

† OXFORD, CHRIST CHURCH CATHEDRAL SCHOOL. Founded 1546, by Henry VIII. The course of instruction includes the usual branches of a Public School education, and is such as to ensure a sound elementary knowledge of Divinity, English, Latin, Greek, French, and Mathematics. The school year is divided into 3 terms. The vacations are at Easter, at Midsummer, and at Christmas. Choristerships and Probationerships: There are in the Cathedral choir eight choristers on the Foundation; these are educated, boarded, and lodged free of expense. There are also six probationers, who become choristers as vacancies occur. School fees: choristers are exempted; probationers for the choir, 40*l.* per annum; boarders in the choir house (tuition included), 60 guineas; boarders, if brothers or sons of clergymen, 55 guineas; day-pupils, 12 to 15 guineas per annum. These charges cover all school and house expenses, except books, stationery, clothes, etc., and medical attendance, if required. There is also a fee of 3 guineas payable upon the election of a probationer to a choristership. There are 16 boarders and 11 day-scholars. Head Master, the Rev Henry C. Rogers, M.A., Ch. Ch., Chaplain of Christ Church Cathedral, Oxford, late Head Master of St. Michael's College, Tenbury, and for four years assistant Master at the Reading School.

OXFORD (*near*) S. KENELM'S SCHOOL. Founded in 1874. This is a high-class Church school intended to supply a good Classical Education in preparation for the Public Schools, the Navy, the Civil Service, the Universities, or the preliminary Army Examinations on Public School lines and on the basis of the Church of England, at a moderate cost. School dues are 45 guineas per annum, paid terminally. An entrance fee of 2 guineas is charged with the first term's payment. The following is a special feature in the school, namely, that arrangement is made for boys to matriculate and keep terms at the University whilst still in the school, enabling them to obtain their degree at the unusually early age of 18, and at a very small extra charge during their last 3 years. Principal, Rev. H. C. B. Cruikshank, A.K.C., London, Chaplain of New College, Oxford, with a staff of assistant Masters.

\* OXFORD, S. EDWARD'S SCHOOL, SUMMERTOWN VILLAGE. The object of this school is to provide at a moderate cost a first-rate liberal education on Public School principles; and by careful religious instruction, to impart a higher moral tone than is to be found in many of our older Public Schools. The school is situated about 2 miles from Oxford, in Summertown Village. The buildings stand on their own grounds of about 10 acres. The chapel is a magnificent building in the Early English style, is connected with the school buildings by a cloister. A spacious covered playground, a fives court, carpenter's shop, and co-operative shop, at which everything can be purchased without going elsewhere. Cricket ground, artificial bathing place, part for swimmers. The ordinary school course includes the usual subjects taught in our Public Schools, but arrangements are made by which boys can learn German, Science, and Book-keeping in place of Greek. The fees are 65 guineas per annum, with 1 guinea entrance fee; some subjects are extra. Boys can

be entered at 9 years old in the lower school. There are 3 vacations in the year, viz., about 2 weeks at Easter, beginning on Easter Tuesday; 7 weeks at Midsummer, beginning about the end of July, and 5 weeks at Christmas, beginning about a week before Christmas Day. **RUTHIN** (*Denbighshire*), **RUTHIN GRAMMAR SCHOOL**. Founded by Gabriel Goodman, Dean of Westminster, 1594. Reconstituted by the Endowed Schools Commissioners 1881. Endowment, 352*l*. This school was selected by the Public School Commissioners as the chief first-grade school of north-east Wales. New buildings are much needed, and it is hoped that the Government will make a grant for this purpose in connection with their scheme for the advancement of education in Wales. For the purposes of study the school is divided into two divisions, Classical and Modern. The subjects taught on the Classical side are Holy Scriptures, Latin, Greek, Mathematics, French, English Composition, Literature, and History, Science, Ancient History, and Geography. The Modern department, while including most of the above-mentioned subjects in the course of study, assigns greater weight to Mathematics, Modern Languages, Drawing, and English subjects, with a view to the preparation of boys for Engineering and Mercantile pursuits. The Junior School is kept, as far as possible, distinct from the other departments, and will receive fuller development and organization as the numbers increase. This school has in time past ranked amongst the best in Wales, and there is no reason why, under the new scheme just brought into operation, it should not regain its prestige. The school is examined in July by the Oxford and Cambridge Board of Examiners. Head Master, Rev. W. P. Whittington, M.A., and 3 assistant Masters.

**RYDE**. See ISLE OF WIGHT.

**SHEFFIELD, FIRTH COLLEGE.** This college was founded for the benefit of senior students, both boys and girls. It was erected and fitted up by the late Mr. Mark Firth, at a cost of 20,000*l.*, and it was opened by His Royal Highness the Duke of Albany on the 27th October, 1879. Mr. Firth was a believer in the importance of extending higher education, and he took great interest in the University Extension scheme, and, in order to give it a local home, not only built this college, but endowed it at a further cost of 5,000*l.*, and gave a chair of Chemistry worth 150*l.* a year. The endowment fund now amounts to 20,000*l.*, and a great educational work is already being carried on at the institution, the objects and aims being almost identical with the Queen's Colleges in Ireland. It is one of many Colleges founded in recent years for the promotion of higher education in the great provincial towns of England. Such institutions are likely in the future to play no unimportant part in the education of this country. They have a three-fold function to perform, and they supply (1) University teaching, (2) Technical instruction, adapted to the needs of their districts, and (3) Popular lectures of interest to all sections of the community. 1. University Teaching.—A University, if complete, should teach, it should examine, granting its degrees and diplomas to successful candidates, and encourage original investigation in all branches of knowledge. Firth College restricts itself to the first and last of the above divisions of the work of a University. Fortunately there is a University of modern growth, which has assigned to it the second only. The University of London is purely an examining body, and justly enjoys a high reputation for the efficient manner in which its examinations are conducted. Firth College confers the advantages of a University training on many who could not otherwise enjoy them. From pecuniary or other reasons it is often difficult for young men, and still more difficult for young women, to be away from home during the years of University life; and a University career would be impossible to many for whom a University at their doors, so to speak, makes it possible. 2. Technical Education.—The advantages of technical education cannot be over-estimated, and it is a very important part of the work of this College. A scientific knowledge of the processes used in the various manufactures will stimulate its possessor to invention and original effort. The rapid advance in the science of electricity is due to a very happy union of

theoretic and practical knowledge in those who deal with it. Such an advance may be safely predicted in the manufactures of this town, if the light of science be thrown upon them by the manufacturers themselves. A course of instruction of this nature is adapted to the special needs of the town and district. 3. Popular Work.—This is not for regular students, but for those who cannot on account of other business afford the time for a University training or systematic technical education. Its object is to arouse and maintain the interest of the community at large in literary and scientific subjects. The Session commences in October. Michaelmas term begins about October 5th and ends about December 20th; Lent term begins January 17th, and ends about March 27th; May term begins about April 11th, and ends about June 19th. The Evening Session is divided into 2 terms of 10 weeks each. Michaelmas term begins about October 10th, and ends about December 16th; Lent term begins about January 17th, and ends about March 27th. Persons seeking admission to the College should be not less than 17 years of age. If under that age they will be required to pass an Entrance Examination in English, Elementary Mathematics, and Elementary Latin, to be held at the College, on the Wednesday and Thursday before the commencement of the session, from 10 to 1. If, however, they have passed the Cambridge or Oxford Senior Local or some corresponding examination they will be excused the Entrance Examination. Those who gain 3 Certificates (in the same year or different years) will be entitled to a certificate of honour. Certificates will not, however, be counted separately unless gained in different subjects, or in different branches of the same subject. Very exceptional merit in the *highest* branch of any subject will also entitle to a certificate of honour, even though 3 ordinary certificates have not been previously gained. Classes will be formed, if desired, for students who wish to be prepared for some examination the subjects of which are not included in the College courses. For such classes a special fee will be charged. Application to be made, in the first instance, to the Principal. Senior Students of Schools can attend these classes or the regular classes, under conditions which can be learnt by inquiry, but the sanction of the Head Master or Mistress of the School in question will be in all cases necessary. Firth Exhibitions.—(1) Two Entrance Exhibitions, each of 15*l.* for 1 year, are annually awarded upon examination,—1 in Classics and Mathematics; 1 in Mathematics and Physical Science. (2) Two Exhibitions, each of 15*l.* for 1 year, are awarded annually to those students of the College who shall be recommended to the Council as having distinguished themselves most at the Annual June Examination. The Sessional fees for each course range from 2 to 4 guineas. The Council consists of Trustees and representatives elected by the Town Council, the Cutlers' Company, and the Universities of Oxford, Cambridge, and London. Officers of the College.—President, Rev. S. Earnshaw, M.A. Principal and Professor of Mathematics and Physics, W. M. Hicks, M.A., 17th Wrangler in 1873, Fellow of St. John's College, Cambridge. Professor of Chemistry, Thomas Carnelly, D.Sc. (London), F.C.S. Professor of Classics and Ancient History, F. G. Brabant, M.A. (Oxford). Lecturer in Harmony, Thomas Tallis Trimmell, Mus. Bac. (Oxford). Demonstrator and Assistant Lecturer in Chemistry, L. T. O'Shea, F.C.S. Laboratory Assistant, R. W. Marshall. Registrar and Secretary, Ensor Drury.

**TOTTENHAM (Middlesex), BRUCE CASTLE SCHOOL.** This school, which takes its name from the property having originally been in the possession of the father of King Robert Bruce, was founded in 1827, by the late Sir Rowland Hill and his brothers, on what then seemed a strange system, for it abolished corporal punishment, treated boys as reasonable beings, and maintained what is now so universally allowed to be true, that it is better to lead than to drive. Many of the original details have long since disappeared, and the present Head Master has introduced many further improvements to keep pace with the requirements of modern education. The extensive grounds and excellent school buildings have ample accommodation for 100 boys (80 boarders at 90*l.*, 80*l.*, 60*l.*, according to age). Boys are prepared for the Universities, all civil, military, and naval examinations, for professional, and also for ordinary business life, high places have been recently (as well as formerly) obtained by pupils of the school, both in the Universities and at Woolwich. A boy can be prepared for any special examination or profession; but in the ordinary course classics and mathematics come first, being considered of equal importance; every day, however, considerable time is devoted to lessons in Modern Languages and English subjects. Young boys are specially trained for any of the large Public Schools. Head Master, Rev. W. Almack, M.A., St. John's, Cambridge, an Old Marlburian. Bursar, E. WESTWARD HO! (*North Devon*) KINGSLEY COLLEGE. Westward Ho! derives its name from the work of Kingsley. This fact led to the conception of the "Kingsley Memorial College." It was opened in the Spring of 1882, with a strong staff of masters and nearly 100 boys, and has already taken high rank as one of our important educational institutions. On the 13th April, 1882, the college, constructed to accommodate 250 boys, was formally opened by the Earl of Portsmouth. After an impressive and imposing ceremony, the noble Earl, accompanied by a party of distinguished visitors, who had assembled for the occasion, inspected and minutely examined the various departments of the College, and all felt fully convinced that they were called upon to inspect the arrangements of a really high-class school. Speeches were delivered by the Noble Earl, Viscount Molesworth, Captain Dumaresq de Carteret-Bisson, the Rev. the Head Master, and others. Westward Ho! is famed as a health resort, and is strongly recommended by eminent physicians on account of its equable climate and invigorating air. The college stands in a fine situation, commanding views of the Bristol Channel, Bideford Bay, the Torridge, etc. It is distinctly a Church of England School, is provided with a beautiful chapel, where short services are held morning and evening, and on Sundays full choral services with sermon. The Head Master is the Chaplain, with the Rev. W. H. Maddock, M.A., ex-Scholar and ex-Fellow of St. John's College, as assistant Chaplain. The dormitories are spacious and are thoroughly ventilated, divided into cubicles, and neatly furnished. Each Form has a separate class-room and study. The dining hall is a spacious room, capable of dining 300 persons, and all the appointments are good. There is an abundant supply of water throughout the college, which has a very fine lavatory and 12 bathrooms. The college

provides for its pupils every desideratum for amusement and healthful recreation. A splendid gymnasium under the care of a first-class military instructor, one of the best salt-water swimming baths in England, lawn tennis and fives courts, cricket, football, golf links, parade drill, library, and reading rooms, etc. The programme of educational work includes the various courses required for the Universities, the Army, Navy, Woolwich, Cooper's Hill, and the different branches of the Public Service. The curriculum embraces the highest Classics and Mathematics, with the usual English subjects, Modern Languages (which command special attention), and Science. Music (piano, organ, violin, all brass and reed instruments and singing), Drawing, and Painting are largely cultivated. Fees: boarders, for boys over 13 years of age, 85 guineas per annum; for boys under 13 years of age, 78 guineas. Day-boys: for tuition only, 20 guineas per annum. These fees are inclusive. Music, Drawing, and Painting are extras. Head Master, Rev. F. Hewson Wall, M.A., LL.D., and a staff of 9 assistant Masters, Graduates in honours; Secretary, Ambrose Berkeley Wall, R.N. A view of the college buildings, and a list of the names of the staff of Masters, with their University distinctions, will be found in this work at page 1006.

WESTWARD HO! (*North Devon*), THE UNITED SERVICES PROPRIETARY COLLEGE. This college was established in 1874, with the primary object of providing sons of officers, who are, or who have been, in Her Majesty's service, with a Public School education at a lower cost than can now be obtained by them elsewhere, and the council and promoters of the school hope to secure for their brother officers similar advantages to those now enjoyed by the clergy at Marlborough, Haileybury, Rossall, and other important Public Schools. The instruction generally follows the Public School curriculum, but it is an especial aim to prepare pupils completely for the multifarious examinations for the Military, Naval, and Civil Services. There is also a senior school for the special education of the more advanced pupils. At present there are 200 boys in the school, nearly all being boarders. The boys are brought up in conformity with the principles of the Church of England, under the College Chaplain, licensed by the Bishop of the Diocese. The terms are at present fixed as follows: For nominated sons of officers, 60 guineas per annum; unnominated sons of officers, 70 guineas; civilians' sons, 75 guineas; nominated day-scholars, 18 guineas; unnominated day-scholars (sons of officers), 21 guineas; unnominated day-scholars (civilians) 24 guineas. The second Master receives into his house boys requiring extra care. House close to college. For terms apply to the second Master. All extras in bill (including books, journey money, weekly allowance, and carpenter's shop) amount to less than 10*l.* per annum on the average. Pupils who cannot leave during the vacations are boarded at the college at a moderate charge. Head Master, Cormell Price, M.A., B.C.L., late Head Master Haileybury College (formerly Scholar and Exhibitioner of Brasenose College, Oxford), and 14 assistant Masters; Chaplain, Rev. G. Willes, M.A.; Secretary, Lieut.-Col. J. E. Burton, late 91st Highlanders.

WESTWARD HO! NASSAU HOUSE. Pupils prepared for the Universities, Army, Navy, and Cooper's Hill Examinations. Westward Ho! being on the north coast of Devon, and receiving the invigorating

Atlantic breezes, is famous for its healthiness, and is therefore admirably adapted for students; it is also free from the temptations incidental to the neighbourhood of London and other large towns, and the well-known golf links afford capital recreation and exercise. It is also strongly recommended by the medical profession for delicate or overgrown boys. Terms: 120*l.* to 150*l.* per annum, or 15*l.* to 20*l.* a month. Principal, Archibald Campbell, M.A., Fourth Wrangler, and late Fellow of St. John's College, Cambridge.

Terms, including school fees, 80 guineas a year. The School Inquiry Commissioners thus report :—"The Worcester Cathedral School is in some respects a model of what a grammar school in a large provincial town ought to be. It teaches Classics well, without neglecting Mathematics and Arithmetic. Few schools in England have a school-room comparable to that at Worcester Cathedral. It is the refectory of

the great Benedictine monastery attached to the cathedral, a superb thirteenth century hall, in length about two-thirds of the length of Westminster Hall, and not dissimilar in its general proportions. It is thus large enough to accommodate all the classes, the noise being moderated by the height of the room." The education is based on the Public School system; is Classical and general, and such as to qualify boys for the Universities, for the Public Services, or for Mercantile pursuits. Modern subjects form a regular part of the school work. 34 certificates, 19 in honours, have been gained by the pupils at the University Locals up to 1873. Head Master, the Rev. W. E. ## ELEMENTARY EDUCATION.

### STATISTICS FOR 1882.

In the report of the Committee of Council on Education for 1881-82, the statistics for the various schools are given up to 31st August, 1882. During the year ending on that date the inspectors visited 18,289 day schools in England and Wales, to which annual grants were made, containing 26,779 departments under separate teachers, and furnishing accommodation for 4,538,320 scholars. There were on the registers of these schools the names of 4,189,612 children, of whom 1,314,609 were under 7 years of age, 2,670,480 between 7 and 13, 158,956 between 13 and 14, and 45,567 above 14. Of these scholars, 3,542,742 were present on the day of the inspector's visit to their respective schools, and 3,015,151 were on an average in daily attendance throughout the year; 2,943,114 having made the requisite number of attendances were qualified to bring grants to their schools, 690,660 (being under 7 years of age) without individual examination, and 2,252,454 (above 7) on passing a satisfactory examination in reading, writing and arithmetic; 661,056 were actually presented for collective, and 2,119,374 for individual examination, and while of these last 1,378,175 passed the prescribed test without failure in any one of the 3 subjects, 89·22 (88·99) scholars out of every 100 examined passed in reading, 81·92 (80·78) in writing, and 77·27 (75·69) in arithmetic. The night schools examined during the year were 1,015 in number: 33,135 scholars above 12 years of age were, on an average, in attendance each night; 34,492 scholars were qualified for examination by having made the required number of attendances during the night school session. Of these 25,370 were actually examined, and out of every 100 scholars so examined, 89·68 passed in reading, 69·07 in writing, and 49·27 in arithmetic. The 18,289 elementary day schools in England and Wales, inspected in 1882, provided accommodation in 26,779 departments for 4,538,320 scholars, and 35,444 certificated teachers were employed in their instruction. The average daily attendance in these schools amounted to only 3,015,151. The accommodation in the great proportion of these schools is much in excess of the number of children attending them. With the present population there might be 5,265,075 (1 in 5) on the registers, and 4,387,562 (1 in 6) in average daily attendance, the returns show only 4,189,612 children on the registers, and

3,015,151 in attendance. In other words, for every 100 children of school age, for whom some 86 school seats have been provided, there are only 79 scholars on the registers, and 57 in daily attendance. The sum expended by School Boards in England during the year under review amounted to 3,946,317*l.*, as compared with 3,591,266 in the previous year; and in Wales to 269,456*l.*, as compared with 230,572. The expenditure may be divided into 6 headings, viz., (1) Administration; (2) maintenance of schools; (3) capital charges for works of a permanent character; (4) repayment of loans contracted for capital charges; (5) interest on loans; (6) miscellaneous. It appears that in England 8·6 per cent., and in Wales 8·4 per cent. of the current expenditure, including the cost of enforcing attendance at school, is incurred in carrying out the provisions of the Education Acts; 20·4 per cent. in England, 18·4 per cent. in Wales, in providing school accommodation; and 70·8 per cent. in England, 72·4 per cent. in Wales, in instructing the children.

A circular has been issued from the Bureau of Education at Washington, showing the comparative statistics of elementary education in fifty principal countries of the world. The subjoined list refers to those countries which have one million pupils or over, in the order of pupils in school:—

| Countries. |                   |     | Population. | Pupils.   |
|------------|-------------------|-----|-------------|-----------|
| 1.         | United States     | ... | 50,152,866  | 9,424,086 |
| 2.         | France            | ... | 36,905,788  | 4,716,935 |
| 3.         | Prussia           | ... | 25,742,404  | 4,007,776 |
| 4.         | England and Wales | ... | 25,165,336  | 3,710,883 |
| 5.         | Japan             | ... | 34,245,323  | 2,162,962 |
| 6.         | Austria           | ... | 21,752,000  | 2,134,683 |
| 7.         | Italy             | ... | 20,801,000  | 1,931,617 |
| 8.         | Hungary           | ... | 15,666,000  | 1,559,636 |
| 9.         | Spain             | ... | 16,507,000  | 1,410,000 |
| 10.        | Russia            | ... | 78,500,000  | 1,213,325 |
| 11.        | Ireland           | ... | 5,411,416   | 1,031,995 |

It will be seen that America and Ireland have the largest ratio of pupils to population—about 1 to 5, while Russia shows the smallest ratio—about 1 to 65.

**CROYDON (Surrey), S. GEORGE'S COLLEGE.** Founded 1869. Curriculum of study—Classics, Modern Languages, Commercial Subjects. Preparation for Matriculation, the Civil Service, and the Military and Naval Schools. Special care and attention are given to the teaching of modern languages—French, German, Spanish, Italian, Portuguese, and Dutch. A preparatory class is annexed to the college. Conducted by the Josephites, and under the patronage of the Right Rev. the Bishop of Southwark. In August 1871 the late Prince Imperial visited this college, in which his intimate companions, the sons of the Baron de Corvisart, were then being educated, and he presided at the distribution of prizes. President, Rev. O. L. Powels, with assistant Masters—native and foreign.

**DUBLIN, ST. GALL'S CATHOLIC UNIVERSITY SCHOOL, 83, STEPHEN'S GREEN.** This school is intended to promote Intermediate and University Education, and to enable Catholic youths to compete on equal terms with their Protestant fellow-countrymen, trained in richly-endowed institutions. His Grace the Archbishop has deemed it desirable to establish a first-class day school. Pupils are prepared for the Entrance and Honour Examinations of the Royal University, for the Intermediate, Civil Service, Legal, and Medical Examinations, and also for admission into an Ecclesiastical Seminary. The course of studies will also be so directed as to include special training for Commercial Life. Pension: for students over 14 years of age, payable in advance, in 3 terms, viz., Christmas, Easter, and Midsummer, 12*l.* 12*s.*; for pupils under 14 years of age, 10*l.* 10*s.* The academical year begins about the 1st of September and ends about the 20th of July. Head Master, the Rev. John C. Egan, and a staff of Professors.

**DUNDALK ST. MARY'S COLLEGE.** Conducted by the Marist Fathers. Under the patronage of His Grace the Lord Primate. The situation of

the college is healthful and attractive. It commands a fine view of the Bay of Dundalk. The Religious and Moral training of the pupils is carefully looked after, whilst special attention is paid to health, deportment, etc. Students are prepared for the Intermediate Examinations, also for the Royal University, Civil Service, Medical Entrance, and other Public Examinations. Equal care is bestowed upon those who are intended for Commercial pursuits, or who, on account of age, or for other reasons, do not compete under the Irish Intermediate Education Act. President, Rev. Patrick Grew, S.M.

**DOWNSIDE**, *near BATH*, COLLEGE OF ST. GREGORY THE GREAT. This college was established at Douai, in 1605, by the monks of the English Benedictine Congregation. Driven from France by the Revolution of 1793, the Fathers and their school were indebted to the generous hospitality of Sir Edward Smythe for a home at Acton Burnell, near Shrewsbury, where they remained till their removal to Downside in 1814. It was affiliated to the University of London in 1841, and consists of over 100 pupils. The system of education traditionally pursued at St. Gregory's is thoroughly English. Many inconveniences are obviated by the exclusion of boys of foreign birth. The ordinary course of studies is framed with a view to preparing students for the London University Examinations. The cultivation of the various sciences is encouraged in every way, and facilitated by the use of chemical and philosophical laboratories, an extensive natural history museum, science clubs, and special prizes. Ample provision is also made for the study of Music, Drawing, Painting, etc. The age for admission is from 9 to 14, but no boy will be received who is not already grounded in Reading, Writing, and Spelling. The pension is: For all under 12 years, 60 guineas per annum; above 12 years, 70 guineas; admitted above 14 years, 80 guineas; in Matriculation Class, 80 guineas; in Undergraduate Class, 100 guineas; for Private Room, 8 guineas. Entrance fee in all cases 3 guineas. The following are the names of a few distinguished men who were educated at this school:—Earl of Kenmare, Lord Chamberlain; Most Rev. Roger Bede Vaughan, Archbishop of Sydney, N.S.W.; Right Rev. W. B. Ullathorne, Bishop of Birmingham; Sir Rowland Blennerhassett, M.P.; Mr. Justice Day; The O'Connor Don, Privy Councillor; Sir John Lambert, K.C.B.; The O'Donoghue, M.P. Prior, the Very Rev. Aidan Gasquet, O.S.B., with a staff of eminent resident Clerical Professors and non-resident lay Professors.

**DUMFRIES** (*N.B., Scotland*), S. JOSEPH'S COLLEGE. This college was established in 1874. The nature of education essentially Commercial. Latin and Greek for those who so desire. French spoken in college, 1 or more French boys generally in school. Average number of scholars, 60, none free; all boarders. Pension, 35*l.* per annum. Scholars are admitted at any age and at any time. Examinations take place at Christmas, Easter, and Midsummer, by the Professors and Superior. Vacations, 8 weeks at Midsummer. Conducted by the Marist Brothers. Provincial, the Rev. Brother Tatianus.

**EDGBASTON**, *near BIRMINGHAM (Warwickshire)*, THE ORATORY SCHOOL. This school is intended to afford to Catholic youth the advantages of the great Public Schools of England. It provides a special preparation for the Examinations at Woolwich, Sandhurst, and the Naval

Service, in which candidates from the oratory have already been successful. Rector, His Eminence Cardinal J. H. Newman, D.D., with Prefects and Masters of the Universities.

ENNIS (*Ireland*), THE KILLALOE DIOCESAN COLLEGE. Patron, Most Rev. James Ryan, D.D., Coadjutor Bishop of Killaloe; President, Very Rev. Michael Culligan; Vice-President, Rev. Denis Kelly. The new Diocesan College, Ennis, built by bishop, clergy, and people of the diocese of Killaloe was opened for the reception of students in August 1881. It was designed by Francis O'Connor, Esq., C.E. The building is 3 stories high; the style of architecture, domestic Gothic. The course of studies is designed to prepare boys for the Ecclesiastical Colleges, for University, Intermediate, and Professional Examinations, as well as for Commercial life. Terms: for boarders, 30*l.* per annum; for day-scholars, 6*l.* per annum. Professors, Rev. M. Culligan, Rev. D. Kelly, Rev. P. Bourke, and 10 others.

FERMOY (*Cork*), S. COLMAN COLLEGE. Head Master, Very Rev. W. Hutch, D.D., and 8 Professors.

FORT AUGUSTUS (*Inverness-shire*), S. BENEDICT'S COLLEGE. This college will be opened for students in 1878, and will offer to the Catholics of Great Britain a first class liberal education. The students, besides being taught the usual course in Classics and Science, will be prepared for University Examinations. The new buildings are furnished with heating apparatus, hot and cold water baths, spacious dormitories, and all the requisites of a comfortable home. Students will be admitted into the preparatory class at 9 years of age. Rector, the Very Rev. Prior Jerome Vaughan, O.S.B.

HATHERSAGE (*Derbyshire*), ROCK HOUSE. A preparatory school for a limited number of pupils from the age of 6 to 12. Pension, 25*l.* per annum. Principals, Mrs. J. V. Gibson and Miss Gibson.

LEE (*Kent*), 9, LEYLAND ROAD. The sons of gentlemen prepared for the Army and Navy, Home and Foreign Civil Service, London University, etc. This year several pupils passed the Sandhurst Preliminary and other Examinations. Principal, Rev. E. von Orsbach, late tutor of their Highnesses the Princes of Thurn and Taxis, aided by most experienced Tutors.

LEICESTER (*Leicestershire*), RATCLIFFE ROMAN CATHOLIC COLLEGE, near LEICESTER. This college is divided into a Senior and Junior School. Instruction in Classics, Mathematics, French, German, and Italian, to boarders, at 35*l.* to 40*l.* per annum each, with extras. President, the Very Rev. James Robert Richmond.

LITTLEHAMPTON (*Sussex*), S. JOSEPH'S APOSTOLIC COLLEGE. S. Joseph's College has been formed out of the Apostolic Schools, which were formerly attached to the Amiens and Boulogne Colleges, and which have now taken refuge in England. Its purpose is to prepare children of all nationalities for Catholic Missions, in bestowing upon them solid instruction by means of a special education. More than ordinary talents are required of them, together with earnest piety and a genuine vocation. In cases where parents cannot afford to pay for children's maintenance, which amounts to about 30*l.* yearly for each child, the establishment will supply the deficiency out of charitable donations and voluntary contributions, on which it chiefly depends for its support. Rector, vacant.

LIVERPOOL (*Lancashire*), GRAMMAR AND COMMERCIAL CATHOLIC INSTITUTE, 26, HOPE STREET. Established 1851. A good and sound commercial education to 125 day-scholars is the primary object; French taught throughout, Latin and Greek to those who require them. Present number of boys, 91. No boarders. Scholars are admitted from 7 years; slight knowledge of Reading and Writing required. Admission, apply to Principal. Examinations take place at Midsummer and Christmas, by staff and Local Clergy. French and German; special attention paid to Mathematics, Physics, and Chemistry. Physical and Chemical Laboratories. Boarders pay 40*l.* to 45*l.* a year. Examinations take place once a month by the President. Every year a number of candidates are sent up for London University, Oxford Local, College of Surgeons, etc. Vacations, 2 weeks at Christmas and 6 weeks at Midsummer. Principal, the Rev. B. Aventine; Vice-Principal, Rev. M. F. O'Reilly, B.Sc. There are 12 Masters, 4 of whom are non-resident.

HENDON, N.W., MILL HILL, S. JOSEPH'S COLLEGE OF THE SACRED HEART FOR FOREIGN MISSIONS. Founded under the special blessing of the Sovereign Pontiff and of the Archbishop and Bishops of the English Hierarchy; and supported by voluntary contributions. The Society of the Sacred Heart for Foreign Missions, which consists both of clergy and of laity, is under the direction of its Superior General, the Right Rev. Herbert Vaughan, Bishop of Salford. Its object is to educate missionaries, for the conversion chiefly of heathen nations. Conditions of admission to the college: 18 years of age, unexceptionable testimonials as to solid piety and probable vocation; sufficient education to enable the candidate to begin philosophy; a thorough apostolic willingness to devote his whole life to foreign missions, and to accept as from God whatever mission he may be thought fit for and appointed to. He will be provided for in old age or illness. A preparatory college has been founded at Kelvedon in Essex. Rector of the college, Very Rev. Peter Benoit.

KENSINGTON, THE CATHOLIC UNIVERSITY COLLEGE. Founded by the Catholic Hierarchy of England, and opened April 9th, 1875. 3 classes of students are admitted; viz., those who wish to follow the normal course of 4 years' study; those who are specially preparing for the University of London, the Army, the Civil Services, and Law. The usual age of admission is 17 and upwards. The scholastic year begins in October, and is divided into 3 terms: Michaelmas, Lent, and Easter. The vacations are about 3 weeks at Christmas, a fortnight at Easter, and about 2 months at Midsummer. The tutorial fees are 36*l.* a year, or 12 guineas per term. ## NATIONAL UNION OF ELEMENTARY TEACHERS.

OFFICES: NEW COURTS CHAMBERS, 57 AND 58, CHANCERY  
LANE, LONDON, W.C.

The National Union of Elementary Teachers was founded in the year 1870 for the purpose of (*a*) Promoting the spread of Education; (*b*) Bringing practical knowledge to bear on educational legislation; (*c*) Uniting the Teachers of Public Elementary Schools in a strong professional organisation; and (*d*) Watching the interests and advancing the welfare of Teachers. These objects have been extended from year to year, and the growth of the Union since its foundation has been regular and constant. At first the annual subscription was at the rate of 1*s.*, or less, per member. In 1873 the Bristol Conference appointed a paid Secretary, and raised the subscriptions to 2*s.* Notwithstanding this increase, the membership grew, and the further increase to 2*s.* 6*d.* per annum, agreed to by the York Conference, was followed by a similar result. The membership of the Union during 1870 was 400, and the number of Associations 26. In 1881 the number of Associations was 321, and the number of members 13,178.

During the 12 years of its existence, this Society has produced a distinct effect upon public opinion and upon the status of the teacher. It has so far succeeded in organising the profession as to unite under one general bond of union about 13,000 of the Public Elementary Teachers of the country. It has also been the means of preventing much impracticable legislation, and of suggesting many useful amendments to the Education Code.

*Secretary.*—Thomas Edmund Heller.

## ROYAL SAVOY SCHOOLS,

LANCASTER PLACE, SAVOY PRECINCT, W.C.

This school was established in 1864 by Her Majesty the Queen, in response to a petition of the recently appointed Chaplain, the Rev. Henry White.

For 19 years (1864—83) the schools have been held in a hired building within the Precinct. In April, 1883, H.R.H. the Duchess of Albany laid the foundation stone of a new school which will be ready for use early in 1884.

The new building was erected at the cost of Her Majesty, and will be fitted up and furnished at the expense of the members of the congregation of the Chapel Royal, Savoy.

The schools consist of

- (1) A Choir School, in which the Choristers of the Chapel receive a free education.
- (2) A Mixed School of boys and girls dwelling within the Precinct.
- (3) An Infant School.
- (4) A Sunday School.
- (5) An Old Scholars' Club, called the Royal Savoy Club, which promotes in due season athletic exercises,—Rowing, Cricket, Foot-ball, Swimming, and Gymnastic practice in the King's College Gymnasium, kindly lent for the purpose until the new Gymnasium is ready.

All these sections of school work and recreation are supported by the members of the Savoy congregation.

Every year a distribution of prizes is held in the Theatre of the University of London, at which one of the Royal Princesses presides.

In 1884 H.R.H. the Duchess of Albany will distribute the prizes.

*Chaplain.*—The Rev. Henry White, M.A.

**THE REV. PHILIP CRICK, M.A.,**

(ASSISTED BY RESIDENT AND VISITING MASTERS),

*Late Scholar of Pembroke College, Cambridge, and formerly  
Assistant Classical Master at Bradfield College, and  
the Oxford Military College.*

---

The Rev. PHILIP CRICK prepares boys for admission into the Public Schools, and special attention is given where parents wish their sons to compete for Entrance Scholarships.

The climate of Worthing is very healthy, and particularly adapted to young and delicate boys. The house is situated in a most favourable position facing the Sea.

The domestic arrangements are under the personal care and management of Mrs. Philip Crick, and parents may be assured of all the comforts of home.

## THE REV. CHAS. PARKHURST BAXTER, M.A.,

For many years Chaplain to the Right Hon. the Earl of Roden, the late Incumbent of Bryansford, successor to the Rev. A. Chichester Burnard, Graduate of Brasenose College, Oxford, and Rector of Berchackett, Dorset, receives a limited number of pupils, from the ages of 15 to 19, to prepare for the Church, Civil Service, Cooper's Hill, Woolwich, Sandhurst, the University Examinations, and the Professions.

Mr. Baxter is assisted by W. E. Wright, Esq., M.A., T.C.D., Highest Honours in Mathematics and Literature, Prizeman and Moderator; by C. Archer, Esq., B.A., Oriel, Oxford, late Classical Scholar, 1st Class Classical Honours; H. Wuensch, Esq., B.A., Oxford; and Foreign Professors of French and German. There are also Masters for Chemistry and Geometrical Drawing, who are accustomed to all our competitive examination work. No expense is spared to keep a thoroughly efficient staff of Masters, and to give every pupil individual attention during the hours of study.

Upton House is a large and magnificent mansion fitted with every convenience, lofty rooms, in a very healthy part of Dorset, situated close to the sea, and surrounded by splendid grounds; beautiful neighbourhood with a charming climate, and particularly suited to delicate boys. It is four hours distant from London, main line, with Station close to the Lodge gates. Bournemouth is within six miles, and Poole two miles.

Mr. Baxter devotes his whole time to his pupils, who, therefore, have great individual attention. A large comfortable common room for reading and writing, in which a good library is provided. Mrs. Baxter has the sole management of the household arrangements.

Each pupil has a room, except in the case of brothers, who sleep in the same room, and are provided with separate beds, etc. Every home comfort, and a most liberal table is supplied.

Steady work is insisted on, but, during the hours of recreation, plenty of healthy outdoor amusements are provided, Cricket, Lawn Tennis, Football, Boating, and Fishing. Twelve hundred acres of Shooting surround the House, so that, if parents desire it, pupils can join in that sport occasionally. Pupils are allowed to bring horses for their own use (a charge of 25s. per week for keep and attendance is made). The success in passing pupils for the different examinations during the past year has been most satisfactory. Wednesdays and Saturdays are half-holidays.

Terms for Residence, Board, and Tuition, **150 to 200 guineas**, according to the subjects selected. Brothers are received at a slightly reduced rate. Payments to be made in advance. The year is divided into three terms, of about three months each, as follow:—

SPRING TERM—January 22nd to April 9th. SUMMER TERM—April 29th to July 30th.  
AUTUMN TERM—September 23rd to December 22nd.

I. The Head Master alone is responsible for the discipline and general management of the School, and for the general management of the Boarding Houses.

II. There are two departments in the School, called respectively the Classical and Modern Departments.

III. In the Classical Department, the course of instruction has special reference to the Universities, Woolwich, and Indian Civil Examinations, &c., &c., and embraces the study of English Literature in addition to the usual curriculum of Public School education.

IV. In the Modern Department, which no boy should enter without a clear understanding between the Parent and the House Master, Greek is discontinued; the course embraces the following subjects:—Latin, Mathematics, English Grammar, Literature and Composition, Modern History, Political and Physical Geography, Precis-writing, and is expressly organised with a view to the Army entrance and Home Civil Service Examination.

V. Mathematics and Modern Languages enter into the course of both Departments, French being considered a necessary part of the course, and German voluntary, though without extra charge.

VI. Chemistry is taught to all boys on the Modern side and to the Middle School on the Classical side. A charge of 10s. per Term is made.

VII. In connection with both Departments there is a Woolwich Class, receiving special instruction in Mathematics and Natural Science, with a view to the Competitive Examination.

VIII. The Junior School is preparatory to either department, and is intended for the youngest pupils, from ten years of age and upwards. The course includes Reading, Writing, Spelling, Arithmetic, and elementary teaching of all kinds.

**SCHOLARSHIPS.**—Fourteen House Scholarships, of the annual value of £40 each, open to Classical Candidates under 15, and to Mathematical Candidates under 16 years of age, on December 1st, tenable in the Masters' Houses. The Bishop Philpott and Lygon Scholarships, each of the annual value of £50. The Lea Scholarship of £50 if held in a Master's House, or £30 if held by a Home Boarder. Two Head Master's Scholarships of the value of £50, held in the School House. Twenty minor Scholarships of £15, if held in a Master's House, or of £10 if held by a Home Boarder. The Faber Exhibition of £12, for one year. All the Scholarships entitle to a free Nomination (£6 per annum in addition), and are tenable, subject to conditions as to industry and good conduct, during residence, and vacancies will be annually competed for in December in each year. The value of several of the minor Scholarships may be increased out of a special Augmentation Fund placed at the disposal of the Head Master.

Pupils may be received in any Boarding House, or, if desired, the Head Master will select a house and arrange for the reception of a Pupil. Home Boarders reside only with their Parents or other Guardians approved of by the Head Master. They may, if desired, be admitted into the Houses for evening preparation. The Head Master also undertakes to arrange for the boarding of boys during the Vacations, if the Parents desire it.

More than forty Open Scholarships and Exhibitions at the Universities have been obtained since 1869; besides entries at Woolwich and many lesser distinctions.

For further information apply to the Rev. the Head Master, or E. B. Scallon, Esq., Secretary.

And 15 ASSISTANT MASTERS.

The School Buildings, comprising Large Hall and a full complement of Class Rooms, were lately rebuilt, and, being on high ground, the site is very healthy, and strongly recommended as such by the most eminent of the Medical Profession in London. No Public School has equal advantages for Boarders in London or its immediate neighbourhood. The accommodation is perfect, and the Head Master's New Boarding House, built at a cost of over £13,000, is not surpassed in completeness. A new Sanatorium is now being added.

There is a beautiful Chapel attached to the School, and one of the finest Playing Fields in the country; there is also a spacious Gymnasium, with a duly qualified Instructor. The number of boys in the school is over 250.

**SCHOOL FEES.**—Tuition, £24 per annum, payable in advance, in three equal Terminal payments of £8—Boarding, £60 per annum, including Laundress and all House Expenses, but not including Tuition.—Entrance Fee to the School, £1 1s.—Extra: Music (Piano), £2 2s. per term; Gymnasium, £1 per term. Day Pupils can dine at the Head Master's or other Boarding Houses for an extra charge of £4 per term.

**ADMISSION.**—1. All applications for admission must be made to the Head Master.—2. A certificate of good conduct is required before admission, from every boy who has been at any other school, or with a private tutor.—3. Age of admission from eight years.—4. Boarders are received by the Head Master, and by the Rev. W. D. Bodkin and the Rev. R. L. Morris, Assistant Masters. All boarding arrangements are under the supervision and control of the Head Master.—5. No boy attending the school as a Day Pupil is allowed to board with any other person than his parent or guardian without the special sanction of the Head Master.—6. A Full Term's Notice is required before the removal of a boy from the school. Any parent failing to give such notice is responsible for the fee of the term following his son's removal.

**SCHOOL YEAR, VACATIONS, HOURS, etc.**—The School Year is divided into Three Terms.—Vacations: Spring, three weeks, commencing middle of April; Summer, seven weeks, commencing end of July; Christmas, five weeks, commencing about 20th December.

There are numerous Scholarships, Exhibitions, and Prizes.

**SYSTEM OF EDUCATION.**—The School is divided into three branches, the Classical, the Modern, and the Junior.—1. The Classical Branch prepares directly for the Universities, the Indian Civil Service, Woolwich, and the other high competitive Examinations. Subjects of Study: Greek, Latin, Mathematics, Arithmetic, Divinity, French, German, English History, and Literature, Physical Science, Drawing.—2. The Modern Branch prepares for Mercantile Life, the Home Civil Service, and similar Examinations. Subjects: Latin, French, German, Divinity, English, History, Geography, Précis Writing, and Dictation, Arithmetic, Mathematics, Physical Science, Drawing.—3. The Junior Branch includes the two Lower Forms, and the course of instruction provides a sound elementary knowledge of Scripture, History, Latin, Arithmetic, French, and the rudiments of Greek, special attention being given to Writing, Dictation, Geography, and English Reading. Special arrangements are made by which boys reading for the Indian Civil Service, and the more difficult Examinations, can be as fully prepared as by any other private tuition. Throughout the School Modern Languages receive more than the usual amount of attention and time. Physical Science forms part of the regular work in all Forms except in the Two Highest (where it is optional) and the Junior School.

The College has been founded for the purpose of giving a First-class Education at the smallest possible cost. The Pupils are prepared for the Universities, Professions, Military and Naval Colleges, and all Competitive Examinations. No Day-boys are admitted.

There is also a Modern Department, in which boys are fitted for Mercantile Pursuits, attention being chiefly bestowed on the study of Modern Languages, Chemistry, Book-keeping, and the usual subjects of an English Education.

The Bible forms part of the regular instruction throughout the School.

The boys attend service regularly in the College Chapel.

The Buildings are large and convenient, situated in a rural and very healthy district, and have excellent Playgrounds attached to them.

There is an Infirmary at some distance from the School Buildings.

The Senior Boys have the privilege of Private Studies.

Scholarships, varying in number and value, are annually awarded to boys resident in the College.

On the entrance of a boy over twelve years of age a character is required from his former Master or Tutor.

# THE ABBEY SCHOOL,

## BECKENHAM, NEAR LONDON.

### FOR BOYS FROM EIGHT TO FIFTEEN.

This School was established in 1866 by the present Head. The premises have been from time to time so extended and improved that they now form one of the most complete and attractive private schools in England.

The course of study corresponds with that of the Public Schools; and most of the boys proceed, when they are about fourteen, to one or other of those Schools. During the past seventeen years boys have gone from the Abbey School to Eton, Winchester, Harrow, Charterhouse, Rugby, Marlborough, Westminster, St. Paul's, Merchant Taylors', Cheltenham, Clifton, Haileybury, Repton, Uppingham, Sherbourne, Tunbridge, the Oxford Military College, etc. Scholarships have also been gained at Charterhouse, Westminster, Marlborough, Wellington, Fettes College (Edinburgh), and elsewhere.

The great majority entered on the Classical side of the above Schools; but some, whose parents preferred German to Greek, were prepared for the Modern side. A few boys also, for whom it was important that they should obtain a good practical knowledge of French and German, have been sent abroad when sufficiently advanced in other subjects.

The classes being small—not more than half the size usual in Public Schools—it is possible to give individual attention to every one. There is always a Master in each Schoolroom during preparation time, to keep order, give necessary assistance, and see that the prescribed work is honestly done. The interest of the boys is kept up by changing from one Master to another for the different subjects.

The morning work is broken into two parts by an interval of half an hour for rest and refreshment.

The House stands in about nine acres of ground. The soil is gravel. The buildings were specially designed for a School. Each boy has a small bedroom or cubicle to himself, which no other boy is allowed, under any circumstances, to enter. There are in all about 60 cubicles, into some of which two beds might be put if it were wished that brothers should be together. The Matron sleeps near the younger boys; the Senior Master's room is amongst the cubicles of the older boys. The whole building is warmed by hot water.

In addition to a good Cricket-field, with pavilion, there is a gravel Playground close to the house, a large Play-room, a Gymnasium, two Fives Courts, a Carpenter's Shop, and a Swimming Bath. Boys who are fond of gardening can have a small piece of ground assigned to them for cultivation.

Two rooms almost entirely isolated from the rest of the house are set apart for the use of boys who may happen at any time to be feeling poorly and unable to go on with their work. But all cases of infectious illness are immediately sent to the Infirmary, a separate building at some distance from the School.

Printed inventory forms, with suggestions as to outfit, may be had on application.

The Terms for Board and Tuition (including School Books and Washing) are One Hundred Guineas a year; but a reduction of Ten Guineas each is made for boys under ten, and for brothers (above ten) in the School at the same time. A further payment of One Guinea a school-time covers the expense of Seat in Church, and maintenance of Infirmary, Cricket-field, and School Library. There are no other necessary expenses. A school-time's notice is required before the removal of a pupil.

The fees for the optional subjects are, for each school-time:—Pianoforte, with use of instrument for daily practice, Three Guineas; Drawing, Two Guineas; Carpentering, with access to workshop three days a week, One Guinea.

There are holidays three times a year, coinciding generally with those of the Public Schools; three weeks in the Spring, seven weeks in the Summer, and five weeks in the Winter.

A Prospectus, containing View of the School, List of Referees, and Extracts from Letters of Parents, Head Masters of Public Schools, and Old Pupils, will be sent on application.

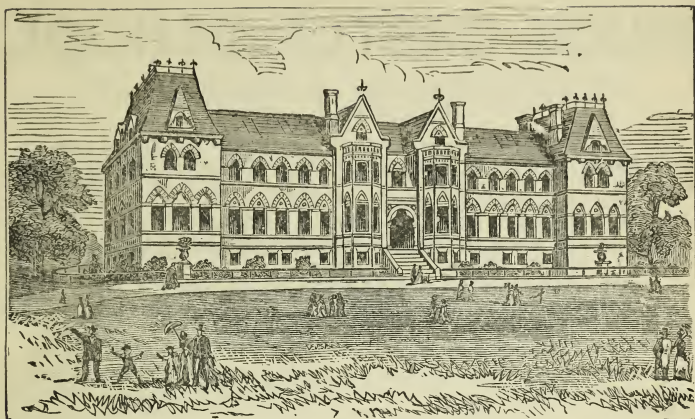

Beckenham is twelve miles from Hyde Park Corner, and can be reached in half an hour from the Victoria, Holborn Viaduct, and Ludgate Hill Stations on the London, Chatham, and Dover Line; or from Charing Cross, Cannon Street, and London Bridge on the South-Eastern.

Boys can be met, if necessary, at any of the London Stations at the beginning of a school-time, and seen off again at the close of it.

The House is about five minutes' walk from Beckenham (Junction) Station.

REV. T. LLOYD PHILLIPS, M.A., PRINCIPAL.

# THE HIGH SCHOOL, MARGATE.

Principal: G. WHARTON ROBINSON, *M.A. OXON.*

*Member of the Council of the College of Preceptors.*

**Plan of Education.**—A good, sound, classical, mathematical, or commercial education is afforded in this School, and it is the aim of the Principal to train each boy with a special view to the career for which he is intended. In order to test his progress, each boy is periodically sent in for some public examination—the senior boys for the London Matriculation and the Oxford and Cambridge Locals, others for the College of Preceptors, and the juniors for the examination established by the Association of Principals of Private Schools. In the general education are included the following subjects:—English in all its branches, French, German, Latin, Greek, Mathematics, Science, and Drawing. Classes are held for Book-keeping and Shorthand, to both of which subjects special care is given. A great number of the boys learn *Music*, both vocal and instrumental; time for lessons and practice is taken out of the school hours in such a way as to prevent the pupils missing too much of their other work. Those boys who can sing are trained in concerted and in Church music; a certain number of them form the choir in the Chapel-of-Ease to the Parish Church. Penny Readings and other *Entertainments* are given from time to time by members of the High School, and any boy who can play, or sing, or recite, is encouraged to do so: The Principal has made it his aim to establish a *sense of honour* and conscientiousness in the School. He makes each boy feel that he is trusted, and responsible in his degree for keeping up the honour and credit of the School; a pleasant and proper feeling is thus established between masters and boys, and an “*esprit de corps*” is engendered, which is essential to the well-being of a large school. A few of the elder boys are chosen as *Monitors*, and greater privileges are accorded to them; the power of punishment is *not* left in their hands, but they overlook the junior boys, and report any misconduct to the masters. A *monthly holiday* is awarded to those boys who earn it by their good conduct. Each boy is encouraged to take part *in the games* of the School—Cricket, Football, Fives, Lawn Tennis, etc. A Gymnasium Class is formed every term for those boys who desire it. At the end of every Summer Term a day is devoted to *Athletic Sports*, which the parents and friends are invited to witness.

**Inclusive Terms.**—For boys under 11, £50 a year.

„ under 14, £60 „  
„ over 14, £72 „

*Books, Stationery, Laundress, and Games' Subscription included.*

# BRUCE CASTLE SCHOOL,

TOTTENHAM, LONDON, N.

ESTABLISHED 1827.

**Head Master** :—REV. W. ALMACK, M.A., St John's College, Cambridge.

## Assistant Masters :

E. BAKER, F.R.G.S., *Bursar and Second Master.*

REV. O. PHILPOTT, M.A., Jesus College, Cambridge, *Senior House Master, Mathematics.*

J. H. ARUNDEL, B.A., New College, Oxford, *Classics.*

P. D. RICHARDS, London, *English.*

L. SORNET, *French.*

Bruce Castle is prettily situated in a Park of upwards of 20 acres, containing excellent Cricket and Football Grounds, also a detached Infirmary ; and though within seven miles of London, has all the advantages of a School completely in the country, being supplied with milk, fruit, and vegetables from its own dairy and gardens. Hot and Cold Baths are attached to the Dormitories, which together with Dining Hall, School and Class-Rooms, are convenient, lofty, and well ventilated. There is a covered Play-Room for wet weather ; a Carpenter's Shop and small Chemical Laboratory ; a Library containing nearly 3000 volumes, to which the pupils have daily access ; and a Reading Club managed by a Committee of Boys and Masters.

The course of Education depends greatly in each case on the line of life for which the pupil is intended ; and boys preparing for the Universities or any special examinations, as Woolwich, Cooper's Hill, Naval, Legal, and Medical "Preliminaries," or for the requirements of commercial life, meet with special *individual* attention ; younger boys intended for the Public Schools are carefully "grounded" with that object.

Within the last few years, Pupils proceeding direct from the School have gained the following honours :—a Wranglership and open Scholarship at Cambridge ; at Oxford—two first Classes in "Finals," a first and second in Moderations, a proxime accessit to the University Junior Mathematical Scholarship, together with two open Scholarships at University College, a high place for Woolwich, also two Scholarships at Marlborough ; while all who have gone to Public Schools have taken extremely good places.

**TERMS** :—Boarders (from 9 years of age) £60 to £100 per annum, according to age.

From time to time the Head Master has at his disposal (by competition or otherwise) a few Entrance Exhibitions.

In case of a boy entering above 14 years of age, special testimonials as to character are required.

*These terms include instruction in Greek, Latin, French, English, and Mathematics ; also School Stationery, and a Seat in Church ; but a charge of One Guinea a Term is made for Laundress.*

The Vacations are a fortnight at Easter, seven weeks in the Summer, beginning about the end of July, and five weeks at Christmas. Special arrangements can be made for Pupils remaining during the holidays.

The most convenient Railway Station is Bruce Grove on Liverpool Street and Enfield branch of the G.E.R.

# LINDENTHORPE, BROADSTAIRS,

## KENT.

---

MR. W. OAK RHIND prepares boys for the Public Schools ; the course of instruction comprising all the branches of a thorough English Education, with Latin and French.

The salubrious and bracing air of Thanet is well known, and Lindenthorpe occupies one of its healthiest sites, overlooking Broadstairs, with a commanding view of the sea, from which the house is separated by two fields.

MRS. RHIND personally superintends the domestic arrangements. The health, happiness, and moral training of pupils are constantly kept in view ; and out-door games and exercises, such as cricket, football, gymnastics, lawn-tennis, receive due attention. In the bathing season, Mr. Rhind, if desired, teaches the boys swimming.

# BARHAM HOUSE,

## ST. LEONARDS-ON-SEA.

---

The REV. J. WRIGHT, M.A., Trinity College, Cambridge (Senior Optime and First Classman in the Classical Tripos); and the REV. ROBERT H. WALKER, M.A., Wadham College, Oxford (First Class Mathematics, and First Class Physical Science), for nine years a Mathematical Master at the Royal Military College, Sandhurst; assisted by two Graduate Masters, educate about thirty boys between the ages of eight and fifteen.

The education is chiefly such as prepares boys for the public schools; but it is at the same time general and thorough. French is taught throughout the School by a Graduate of Paris; German can be substituted for Greek in special cases; Drawing is taught by the Master of the School of Art in connection with South Kensington. All the boys are regularly drilled.

The whole School is continually examined, so that not only is the knowledge of the boys well tested, but they acquire a facility for passing examinations in other places. Many of them have obtained Scholarships at Winchester, Harrow, Wellington, Radley, and other Schools.

Barham House stands in its own grounds on a hill in the healthiest part of St. Leonards. It was built expressly for a School, and is provided with every convenience for the purpose; the play-ground is large, and there is a covered play-hall for wet weather and for drill. A private field for cricket and football is at a short distance from the house. In the summer terms the boys bathe in the sea; at other seasons the large baths at Hastings afford the opportunity of bathing and of receiving instruction in swimming. There is a Sanatorium at a short distance from the house.

The boys are escorted by a Master from and to London.

The yearly charge, which includes French, Drilling, and Laundress, is a hundred and twenty guineas.

The year is divided into Three Terms, as at Eton and Harrow. A Term's notice is required before the removal of a Pupil.

Head Master: THE REV. C. W. ARNOLD, M.A.,

*Prizeman and Wrangler of Trinity College, Cambridge, late Head Master of the Royal Naval School, New Cross, and formerly Head Master of King Edward's School, Chelmsford.*

The regular course of Instruction is the same as that pursued in the Public Schools, with *special preparation* when required. Boys are prepared for the Universities, Public Schools, Army, Navy, Woolwich, Civil Service, and other Professional or Competitive Examinations, in which the Head Master has had great experience.

German is substituted for Greek when desired.

Boys destined for mercantile or commercial life are carefully prepared in all subjects required including French and German correspondence, and Book-keeping.

The great aim is *thorough teaching*; nothing superficial is attempted. There are three Resident Masters. The Head Master takes a portion of the work in *every* class, and examines each class weekly in that part of the Classical work which he has not taught personally, so that he may know accurately what progress each boy is making.

An additional Wing has been added to the Grange, thus completing the original plan of the house. The advantages gained are—(1) A larger Schoolroom and more Class-rooms ; (2) A certain amount of Dormitory accommodation on the Cubicle System ; (3) Improvement in Lavatory and other arrangements.

The course of instruction includes Religious Knowledge, Classics, Mathematics, French, English, History, Geography, Writing, and Drill.

The hours of work consist of three hours in the morning, two in the afternoon (except on Wednesday and Saturday, which are half holidays), and one hour of preparation in the evening.

There are three weeks' holidays at Easter, seven in the Summer, and five at Christmas.

A weekly allowance of pocket-money is made to each boy, and charged in his account.

The Grange was built in 1878, expressly for School purposes, in the healthiest part of Eastbourne ; the sanitary arrangements have been made according to the advice of an eminent London Physician ; special care has thus been taken to ensure perfect dryness, drainage, and ventilation.

A detached Sanatorium has recently been built at a convenient distance from the Grange, and is under the charge of an experienced lady, to act as matron in case of illness. A large Play-room has also been added as a covered Playground in bad weather.

The grounds of the Grange afford ample space for Cricket, Football, and other games. New Fives Courts have recently been added, and a large Play-room as a covered Play-ground in bad weather.

Eastbourne is noted for one of the finest salt-water baths in England, and every encouragement is given to the boys to learn to swim.

The climate of Eastbourne is essentially bracing, and is specially recommended as suitable for young or delicate children.

Eastbourne, 3 miles from Beachey Head, is 23 from Brighton, 18 from Hastings, and 66 from London. It is reached in 2 hours from Victoria and London Bridge Stations.

 Drill and Gymnastics—Mr. A. M. CHIOSSO (late Prof. of Gymnastics, University Coll., Lond.).  
 ENGLISH GOVERNESS.

Linton House is a High Class Private School for sons of gentlemen. The course of instruction includes English in all its branches, Latin, Greek, French, German, Writing, Arithmetic, Algebra, Geometry, and Natural Science. The first and constant aim of the School is to give the pupils a thorough grounding in the elementary parts of each subject, as this alone ensures regular and rapid advancement in the higher stages of education.

The School consists of two Departments:—

- I. THE PREPARATORY DEPARTMENT—for boys from six to ten years of age. This section is conducted on the model of the Preparatory Schools in Edinburgh, which have done so much for elementary education in Scotland.
- II. THE SENIOR DEPARTMENT—for boys above ten years of age. In this section pupils are prepared for the Public Schools and the Universities, or for Commercial life.

The main features of the School are as follows:—

**Size of Classes.**—The number of pupils in each class is strictly limited. Thus each boy daily receives particular attention, while the classes are large enough to secure that wholesome emulation for want of which private tuition so often fails.

**Preparation of Lessons.**—Part of each day is occupied in the preparation of next day's lessons under a Master, since it is believed that genuine progress can be made only when pupils are systematically taught *how to learn*. The amount of home-work is thus lessened, what is too often an irksome task to boys becomes a real pleasure, and parents are saved much trouble, or the extra expense of providing a private tutor.

**Modern Languages.**—Much time is devoted to the study of Modern Languages.

**Examinations.**—Examinations are held at regular intervals, and these are conducted once a year by independent Examiners.

**Physical Exercise.**—The pupils, accompanied by a Master, may attend Captain Chiosso's Gymnasium for Drill and Gymnastics, or may take lessons in Swimming at the Baths, Queen's Road, Bayswater.

**Moral Training.**—In the routine of every class, Bible lessons occupy an important place, and the moral training of the pupils receives constant and unwearying attention from the Principal, whose aim is that the boys under his care shall acquire, not sound scholarship only, but also a sterling character and a gentlemanly bearing.

The Drawing Class is under the supervision of Mr. HARDIE's brother-in-law, JOHN PETTIE, Esq., R.A.

**Terms.**—Under Ten years of age—Yearly Boarders, 80 guineas per annum; Weekly Boarders, 70 gs. per ann.; Day Boarders, 40 gs. per ann.; Day Pupils, 25 gs. per ann. Above Ten years of age—Yearly Boarders, 90 gs. per ann.; Weekly Boarders, 80 gs. per ann.; Day Boarders, 45 gs. per ann.; Day Pupils, 30 gs. per ann. **Extras.**—Music, 2½ gs. or 4 gs. per term. Drawing, 2 gs. per term; German, Dancing, and Gymnastics, each, £1 11s. 6d. per term; Singing (in class), ½ guinea per term; Swimming (Course of Twelve Lessons), 1 guinea per term; Laundress, 5 gs. per ann.; Seat in Church, 1 guinea per ann.—An extra charge of ½ guinea per term is made in the case of Weekly Boarders for the use of bed and table linen. Day Pupils or Day Boarders may remain for tea and evening preparation at a further charge of 3 gs. per term.

**School Hours.**—9 a.m. to 12.30 p.m.; 2.30 p.m. to 4.30 p.m.

**Holidays.**—Saturday is a whole Holiday; Easter, two weeks; Summer, eight weeks; Christmas, three weeks. Special holiday arrangements are made for pupils whose parents reside abroad.

The school year is divided into three terms, the first ending about Easter, the second at the end of July, and the third at Christmas.

# RINGSLOW, WESTGATE-ON-SEA, KENT.

## W. THORNTON BULLOCK, M.A.

(Late exhibitioner of Lincoln College, Oxford ; Classical Honours in Moderations, and for eight years Assistant Master at Temple Grove, East Sheen), assisted by competent Masters, prepares boys for the Public Schools.

Resident French and German Masters.

The Terms are 100 guineas per annum, with entrance fee of five guineas. These terms include Board, Washing, and Instruction in Greek, Latin, French, English, Mathematics, History, Geography, and Drilling.

Eighty guineas for sons of clergy.

The only necessary extras are half-a-guinea terminally for medical attendance, three shillings and sixpence for church sitting, and the cost of school books.

Instrumental Music, German, Drawing, and Dancing are optional subjects, for each of which a charge of £2 2s. per term is made.

There is a workshop where a limited number of boys can be taught carpentry, The charge, which includes the use of necessary tools, is half-a-guinea per term.

Boys are admitted at the age of seven, if they can read and write fairly well. Every boy who has been previously to school, must bring with him a certificate of good moral character.

No boy may remain after 14½ years of age.

The dormitories are divided into separate cubicles, or sleeping apartments for each boy; and each dormitory has a matron's and a bath room attached.

A large gravel playground, with asphalte lawn-tennis court, adjoins the School House, and there is a cricket ground opposite.

There is excellent safe sea-bathing, and all boys can be taught swimming.

A Library is provided, and it is requested that boys bring no story books with them, except such as are given to them by their parents.

There is a separate sick-house in case of necessity.

A monthly report is sent home of each boy's progress, work, and conduct.

The year is divided into three terms, viz., from January to Easter, from Easter to July, and from September to Christmas.

There is a vacation of three weeks at Easter, seven weeks in the Summer, and five weeks at Christmas. The Summer vacation commences on the last Tuesday in July.

Mr. Bullock takes the boys to London on the last day of term, and meets them in London on their return to School after the holidays.

A term's notice or payment is required before the removal of any boy.

Communications respecting clothes or health may be addressed to Mrs. Bullock.

Scholarships gained between September, 1882, and September, 1883, at Wellington, Winchester, and St. Paul's.

Præmia Merentibus Dentur.

## ❖ RAMSEY ÷ GRAMMAR ÷ SCHOOL. ❖ ISLE OF MAN.

TRUSTEES.—The Right Rev. Lord Bishop of Sodor and Man; the Incumbent of Ramsey, the High-Bailiff of Ramsey; James Murray Cruickshank, Esq.; J. W. Wood, M.R.C.S., and L.R.C.P.E.; Mr. W. Laughlin; Mr. T. Teare.

HEAD MASTER: T. R. KNEALE, B.A., late Exhibitioner of Emmanuel College, Cambridge, and Assistant-Master at the Royal Medical College, Surrey.

Ramsey is beautifully situated in the North of the Isle of Man; it is exceedingly healthy, and well supplied with pure water. From the healthiness of the locality, and its proximity to the sea, it is a most desirable place to send boys. The Climate of Ramsey in winter, as well as during the rest of the year, is especially suitable for children, while the sanitary arrangements of the school have been pronounced by eminent authorities perfect. The Headmaster is provided with an excellent house close to the sea, where every care is taken that Boarders will be comfortable. Abundant provision is made for out-door exercise.

COURSE OF EDUCATION.—The School is divided into Three Classes. The subjects taught are—Latin, Euclid, Algebra, Arithmetic, Mensuration, Land Surveying, Book-keeping, and all branches of an English Education.

SCHOLARSHIPS AND PRIZES.—An open Scholarship of £10, tenable at King William's College or at any large Public School, will be awarded after the Midsummer Examination. A Scholarship for natives, or the sons of *bonâ fide* residents of the Isle of Man, tenable at the School itself, will be awarded to the head boy in Mathematics, and secures him a Free Education for the ensuing school year. A Prize in Books, value Two Guineas, will be awarded at the Midsummer Examination for an English Essay and the best knowledge of a period of English History. Scholarships value £10 each are given by the Trustees of King William's College, to be competed for by pupils of the Insular Grammar Schools.

SCHOOL FEES.—Boys over 12 years, £1 7s. 6d. per quarter; boys under 12 years, £1 2s. 6d. per quarter. Extras—French and Greek, each, 10s. per quarter; Drawing, 5s. od. per quarter. Boarders (including school fees)—Boys over 12 years, 40 guineas per annum; boys under 12 years, 35 guineas per annum; Weekly Boarders, 30 guineas per annum.

Quarter Days—March 25th, June 12th, September 29th, and December 25th.

Vacations—Midsummer, Six Weeks; Christmas, Three Weeks; Easter, One week.

## THANET LODGE PREPARATORY SCHOOL.

IN CONNEXION WITH THANET COLLEGE.

HEAD MISTRESS :—MISS HODGES.

Assisted by an Efficient Staff of Lady Teachers.

**THANET COLLEGE** is delightfully situated on an eminence on the road to St. Peter's, near Draper's Mills, at a short distance from the town. It is surrounded by a fine and open country, and its grounds and premises for the recreation of the students are upwards of six acres in extent. The school has three Cricket Fields, large open and covered Play Grounds, Bowling Green, Lawn Tennis Court, Gymnasium, Racket Court, Swimming Bath, Laboratory, Turning Room, Carpenter's Shop, etc.

All the boys bathe in the sea during the summer months, and during the winter season in the Swimming Bath, which is heated to summer temperature; thus every facility is afforded to pupils of acquiring the useful art of swimming.

The Chemical and Science Laboratory is placed under the charge of an experienced Science Teacher, and a competent Instructor in Carpentry attends to give lessons in the Carpenter's Shop and Lathe Room.

**THANET LODGE** is situated a short distance from Thanet College. It is well adapted to the purpose for which it was designed, and it possesses extensive grounds, Cricket Field, Racket Court, and Play Ground.

The pupils enjoy the same advantages as those of the Upper School; they have the use of the large Swimming Bath, and once a week they engage in outdoor games with the Upper School boys. They are invited to Lectures and Entertainments at the College, and they then form the acquaintance of those who in many cases become their future schoolfellows.

During the principalship of the late Mr. CHAS. LEO. NUTTER, M.A., the Lodge was renovated and enlarged, under the care of an eminent architect.

There are three School Terms in the year, beginning respectively about the end of January, the beginning of May, and the middle of September, the Vacations being month at Christmas, a fortnight in the Spring, and seven weeks in the Autumn.

## STAFF.

GOVERNOR.—Major-General DESBOROUGH, C.B.  
HEAD MASTER.—A. A. BOURNE, Esq., M.A., F.G.S., 17th Wrangler and 2nd Class in Classics, Scholar  
of St. John's College, Cambridge, late Head Mathematical Master at Rossall School.  
DIRECTOR OF DRILLS.—Lieut.-Col. A. S. MACARTNEY (h.p.), Royal Artillery; formerly Cadet Officer,  
Royal Military Academy, Woolwich.

And a Staff of Sixteen Assistant Masters.

This College was established—(I.) For the purpose of combining the advantages of a Public School  
training with those of private tuition. (II.) To provide for the sons of Officers of the Army, Navy and  
Auxiliary Forces—to whom preference for admission is accorded—and for as many sons of Civilians as  
can be accommodated, the best possible preparation for competitive and other examinations, especially  
for Woolwich, Sandhurst, for Home and Indian Civil Service, Matriculation at the Universities, etc., or  
to give a good general education.

The system adopted aims at the development, in individuals, of those branches of learning for which  
they may happen to have an aptitude, and which will be useful in their intended career.

Systematic instruction is given for about one hour daily in military riding, sword and lance exercise,  
infantry drill, swimming, and gymnastics. A *manège*, swimming bath, and gymnasium form part of the  
institution. Uniform is worn.

Officers serving abroad are specially considered in reference to vacation arrangements, etc.

Several valuable Scholarships are annually awarded. To encourage students to seek a high standard  
the Council return one year's fees to every candidate whose name appears among the first five on the  
list of successful candidates for Woolwich or Sandhurst, and one term's fees to those candidates whose  
names appear among the first ten. Three swords and a number of valuable prizes are given annually.

## SCALE OF FEES.

|                                                                                        | £   | s. | d. |
|----------------------------------------------------------------------------------------|-----|----|----|
| Students 17 years of age and over, whether they take the full military course or not.. | 105 | 0  | 0  |
| Students between the ages of 13 and 17, taking the full military course .. ..          | 105 | 0  | 0  |
| Students between the ages of 13 and 17, not taking the full military course .. ..      | 94  | 10 | 0  |

Holders of 20 Shares are entitled to nominate a student, and if such nomination is used in favour  
of a relative, the reduction on the fee is £21 per annum on the first three amounts and £10 10s. on the  
last. If the nomination is used in favor of others than relatives, the reduction is £10 10s. per annum.  
Holders of 20 Debentures are entitled to nominate a student at a reduction of £10 10s. on the fees all  
round.

An entrance fee of £5 5s. is charged for every student entering the College. The funds so raised are  
employed to found Scholarships and award prizes.

For further information apply to the Governor, Head Master, or Secretary.

UPWARDS OF 100 CANDIDATES HAVE WITHIN THE LAST SIX YEARS PASSED DIRECT

**MR. F. T. LAWRENCE,**

BARRISTER-AT-LAW, *formerly one of the ASSISTANT MASTERS in WELLINGTON COLLEGE and in RUGBY SCHOOL,*

with the aid of a competent Staff, prepares a SMALL NUMBER of Pupils for  
SANDHURST and WOOLWICH,

The EXAMINATION for SUBALTERNs of MILITIA,

The STAFF COLLEGE, the UNIVERSITIES,  
and certain other Public Examinations.

Mr. LAWRENCE has been exceptionally successful, only one Pupil who had read with him as much as six months having ever failed for Sandhurst; and none having ever failed for the Militia Examination.

He will gladly give to Visitors or Correspondents his best advice, and is able to refer to a long list of successful Pupils and their immediate friends.

Pupils may join at any time, for a shorter or longer period; and work is continued throughout the year.

---

The FEES (inclusive and payable in advance) are for Resident Pupils (of whom *a few only* are received), Fifty Guineas, and for Non-resident Pupils Twenty-five Guineas, per term of 3 months, beginning at any time: for shorter periods at the respective rates of Twenty and Ten Guineas monthly. A reduction is made for the sons of Officers or Clergy.

---

Mr. LAWRENCE has recently removed to this more convenient situation from Berners Street, where for several years he had continued the work of his former colleague, the Rev. H. A. D. SURRIDGE, now of Bowdon, Cheshire.

## SPECIAL PREPARATION

FOR

Military Examinations, Militia Competitive, Staff  
College,

ARMY & VOLUNTEER PROMOTION.

---

Principals of Establishments wishing to ENSURE the thorough PREPARATION of their PUPILS are referred to an Artillery Officer of long experience and unvarying success, whose system of INSTRUCTION in FORTIFICATION, TOPOGRAPHY, MILITARY LAW, and TACTICS, promote a sound and exhaustive knowledge of these subjects, even with a short course of study, when necessary.

Great care is taken to establish a consistent system of discipline, and by making the Lectures interesting as well as instructive, to create a spirit of earnestness and devotion to work.

Successes hitherto average two out of every three sent in.

**TERMS ARE NEVER MADE A DIFFICULTY IN THE CASE OF A GOOD PUPIL. PROSPECTUSES ON APPLICATION.**

## 20, BIRCHINGTON ROAD, KILBURN, LONDON, N.W.

### MR. CHARLES RICHARDS,

*Mathematical Tutor to the late Prince Imperial,*

Prepares a few Gentlemen for Woolwich, Sandhurst, etc.

*TERMS (payable in advance), per Month of Four Weeks :*

Fifteen Guineas, resident ; Seven Guineas, non-resident ; Twelve Guineas weekly boarders.

The fees may be paid per term in advance, with a deduction of five per cent. on the above rates.

Mr. Richards is assisted by the following successful tutors :—

|                            |     |                               |

| Legh Kilpin, Esq.          | ... | Perspective Drawing.          |

He takes under his special control the entire Mathematics, Geometrical Drawing, History, and Preliminary Subjects, and gives assistance in Latin, French, and English Literature.

He is able, owing to his small number of pupils, to give a great deal of individual attention, and devotes his evenings to the assistance of resident pupils.

As he is anxious to keep up the very high standard of success he has attained, he can only receive as pupils those who are willing to engage in good earnest work, and to conform to the arrangements for evening studies.

Each pupil has a separate bedroom.

The only extras are for Laundress, 10/6 per month.

Books to be provided by the pupils, or purchased for them and charged on the account.

Non-resident pupils have Lunch at one o'clock without extra charge.

Mr. Richards gives £5 to all his pupils who pass in the first ten.

The following are the names of Mr. Richard's pupils who have passed at various examinations :—

# EDUCATION IN FRANCE AND GERMANY.

International Institution.

Dr. KORNEMANN,  
51, Avenue Malakoff, Paris.

This Educational Establishment for Young Gentlemen, partly conducted in Paris and partly at Coburg, Saxe, Germany, has been founded and is directed by Dr. Kornemann, formerly a tutor in the Monod family at Paris, who prepares his pupils for the Universities, the Army, or Mercantile life. His object is to combine, as far as possible, the advantages of a Home Education with those of a Regular College. The German and French Languages are spoken in the Institution.

## TERMS

(Paid by Tenths, in Three Times, and in Advance).

Instruction in Classics, Mathematics, Geography, History, English, French and German languages, Literature, Caligraphy, Drawing, and Gymnastics.

**Board—ONE HUNDRED GUINEAS PER ANNUM.**

*A Quarter's Notice or payment of a Quarter is required previously to the Removal of a Pupil.*

The only Vacation is from the 1st of September to the 1st of October. A Pupil may remain during Vacation on paying an extra charge of 10 guineas, or participate in the Holiday Trip conducted by Dr. Kornemann, on paying his share of the expenses.

Each young gentleman is requested to bring two pairs of sheets, six towels, six table napkins, a fork and a spoon.

For prospectuses and further information apply to the Principal.

DR. SCHMITZ'S  
CLASSICAL & COMMERCIAL COLLEGE  
FOR  
YOUNG GENTLEMEN  
AT  
HAMELN, NEAR HANOVER, PRUSSIA.

SPECIALLY RECOMMENDED.

AT BRUSSELS

(AVENUE LOUISE).

PRIVATE EDUCATION

FOR A FEW YOUNG GENTLEMEN,

Under the Direction of

PROFESSOR V. DOUBLET DE VILLERS,  
OF THE UNIVERSITY OF PARIS.

The number of Pupils is SELECT AND EXTREMELY LIMITED. Special Classes of FRENCH and GERMAN for Candidates and Young Gentlemen who go into business.

*As M. V. Doublet de Villers teaches French himself, and as that language is the only one spoken in the house, the Pupils will soon acquire an excellent pronunciation.*

Parents sending their sons to this establishment may rely upon their receiving a first-class finishing education, together with the advantages of a well-regulated and comfortable home.

M. DOUBLET DE VILLERS has had twenty years' experience; and for a period of fifteen years he has successfully conducted this establishment, and is well and favourably known to many English families of repute, whose sons have been under his care. He is assisted by the most distinguished masters, and with their aid he prepares Young Gentlemen for Commercial pursuits, and for entrance into the Army and Navy, Public Schools, the Civil Service, Banking Establishments, etc. He also ensures the most rapid progress in *Modern and Ancient Languages*.

The success which the ENGLISH and FRENCH PUPILS have achieved at the above-mentioned examinations is a sufficient proof of the thoroughness of the system of instruction adopted.

*Youths whose education has been neglected on account of ill-health, etc., are carefully and expeditiously advanced.*

The progress of the Pupils is tested by frequent examinations, the result of which is made known to the Parents by monthly reports.

The classes are held in a well-aired room overlooking the surrounding country.

The number of Pupils is **select and extremely limited** (the maximum number being ten Pupils).

The domestic arrangements are under the care of Madame Doublet de Villers, and the object kept in view is to add to the necessary duties of the School the cheerfulness and refinement of home life. It is so arranged that the Young Gentlemen can observe all their religious duties exactly as if in their own homes.

The meals are taken with the family, and the Young Pupils meet with special care from Mrs Doublet de Villers.

~~~~~  
Terms.

100 Guineas per annum, payable in advance: 25 Guineas per quarter from the day of entry.

No Extras.

An important reduction in the price is made for two Brothers or younger Pupils.

No Vacations.

Three months' notice, or a quarter's payment is exacted.
~~~~~

N.B.—The best references can be obtained both in England and Belgium, from gentlemen whose sons, now occupying important positions, have been educated by M. Doublet de Villers.

Apply for further information to Professor V. Doublet de Villers, 86, Chaussée de Vleurgat (Avenue de Louise), Brussels; Reference to Captain F. S. de Carteret-Bisson, Author of "Our Schools and Colleges," Beaconsfield Club, Marlborough Gate, London, S.W.

# LAUSANNE, SWITZERLAND.

## INSTITUTION OF DR. GOERGENS.

DR. GOERGENS receives into his establishment but a limited number of pupils between the ages of eight and seventeen, which allows the director to consider them as members of his family, and to treat them as his own children. The end pursued by the Principal is to promote with an equal solicitude the religious, moral, intellectual, and physical development of the pupils committed to his care.

If particularly desired, preparation is given for the Civil Service, Woolwich, Sandhurst, the Army, the Navy, etc., and other English Examinations.

The Principal is assisted in the accomplishment of his task by distinguished masters, natives of France, French Switzerland, Germany, and England. The French, German, and English languages are habitually spoken by the pupils. In this respect Dr. Goergens offers them a great advantage, living, as they do, in constant intercourse with the Director, his family, and the German and French pupils resident in this establishment. The lessons are given in French; but in the higher classes German and English are given in those respective languages. The Principal ardently desires to imbue his pupils with a simple, sincere, evangelical, and religious spirit, and to make it the basis of the education which they receive. He seeks to develop in them the serious qualities of judgment by the habit of reflection, and to inspire them with a taste for study.

The discipline is strict, but paternal, the surveillance constant, but not irksome. The manner of life is very regular; it abounds in comforts, and, without excluding variety, it is always quiet and sober.

The residence is spacious, healthy, and agreeable.

The terms are 2,200 Francs per annum, including the washing and mending of linen, and the repairing and cleaning of clothes.

The fee for board and education is payable in advance, either half yearly or quarterly, according to the wish of the parents.

Pupils are expected to bring 6 table-napkins, 6 towels, 6 sheets, 3 pillow-cases, and a silver fork and spoon. If not, they have to pay 50 Francs.

Lessons in Italian, in Spanish, as also in the more elegant accomplishments (Drawing, Music, Dancing, Riding, etc.), are objects of separate consideration. Linear and Artistic Drawing are obligatory, and the charge is 30 Francs for three months.

No extra charge is made for pupils spending the vacations at the school. The pupils usually spend part of them in excursions, accompanied by the Principal and the teachers.

Dr. GOERGENS,

LAUSANNE.

## EDUCATION IN JERSEY.

# ST. JAMES'S Collegiate School and Military Academy, HIGHLANDS, JERSEY.

ESTABLISHED 1832.

(LATE PRINCIPAL, DR. GUY THOMPSON.)

**Principal, The Rev. JAMES CARDWELL, M.A.,***Late Mathematical Scholar and Prizeman of Gonville and Caius College, Cambridge, 26th Wrangler, 1870; for eight years Head Master of the Sheffield Collegiate School.*

The object of the School is to provide a sound and liberal Education for the Sons of Gentlemen; more especially to prepare them thoroughly for the various Examinations required for entrance into Her Majesty's Services, the Universities and the Learned Professions; also to afford a suitable course of Mercantile Studies for such as intend to enter the higher departments of Commerce. The Course of Instruction includes the usual subjects comprised in the curriculum of a First-Grade School, viz., Divinity, Classics, Mathematics, Modern Languages, and Natural Science. While due attention is given to Divinity and Classics, special stress is laid upon the efficient teaching of Mathematics, Modern Languages, and Science; an unusual proportion of the school hours is allotted to these subjects, and every effort is made to secure proficiency in speaking and writing French and German. In the junior part of the School a thorough Instruction in Elementary Subjects is aimed at, so as to provide against failure in them at a subsequent period; while the studies of the older Pupils receive the particular direction which each one requires. Each department is under the immediate supervision of the Principal—both Senior and Junior classes coming in turn under his instruction. Upwards of 300 Candidates have been successfully prepared for various Competitive Examinations, many of them taking very high places, especially in the Examination for entrance to Sandhurst and Woolwich.

# HERR STEMPEL'S GYMNASIUM AND SCHOOL OF ARMS. DEPOT OF Gymnastic Apparatus & Athletic Requisites.

**75, ALBANY STREET, REGENT'S PARK, LONDON, N.W.**

(Three minutes' walk from Portland Road Station, Metropolitan Railway).

**H**ERR STEMPEL has now for the last **Six Years** introduced into England his Gymnastic Apparatus of German manufacture, and they have met with universal approval and success. Their beautiful workmanship, finish, and durability, combined with moderate price, in comparison with instruments made here, is admitted wherever his Apparatus have been adopted.

The following are only a few of the numerous Gymnasias Herr STEMPEL has had the honour of fitting up and supplying with his highly improved Gymnastic Apparatus :—

The **ORION-GYMNASIUM**, Casterton Street, South Hackney, E.

The **EXETER HALL GYMNASIUM** of the Young Men's Christian Association, Exeter Hall, Strand, W.C.

The **LILLIE BRIDGE GYMNASIUM**, Lillie Bridge Grounds, West Brompton, S.W.

The **PADDINGTON BATHS GYMNASIUM**, Queen's Road, Bayswater, W.

The Gymnasium of the **SOUTH NORWOOD GYMNASIAC SOCIETY**, The Drill Hall, South Norwood, S.E.

The **LADIES' GYMNASIUM** of **MILTON MOUNT COLLEGE**, near Gravesend, Kent.

The Gymnasium of the **NORTH LONDON COLLEGIATE SCHOOL FOR GIRLS**, Sandall Road, Camden Road, N.W.

The Gymnasium (**SWEDISH SYSTEM**) of the **LADIES' COLLEGE**, Guernsey.

The Gymnasium of **CHATHAM HOUSE COLLEGE**, Ramsgate.

The Gymnasium of **BRADFIELD COLLEGE**, Reading.

The Gymnasium of **FELSTEAD SCHOOL**, Essex.

The Gymnasium of **KINGSLEY COLLEGE**, Westward Ho North Devon, &c., &c., &c.,

Herr Stempel's Gymnasium forms a Model in itself of the most approved apparatus, all on the celebrated movable German system, for general use, exhibiting various arrangements and mechanical contrivances. He will be most happy to show and explain to intending purchasers ANYTHING THEY DESIRE to know.

An extensive Pattern Book with Photographs, Drawings, and Designs of Gymnastic Apparatus, as well as a most elaborate large MODEL GYMNASIUM (6 ft. 6 in. by 3 ft. 2 in., 2 ft. high—one tenth of natural size), also on view.

Owing to the greatly increased demand for Gymnastic Apparatus, Herr STEMPEL has entirely revised his Catalogue, and offers now his imported Apparatus carriage *FREE from Germany to his depot*, thereby fulfilling the wishes of his numerous patrons.

Herr STEMPEL begs to lead the attention of the public to the inadvisability of purchasing TOO CHEAP apparatus, such as are otherwise advertised. Strength, good workmanship, and durability are incompatible with cheapness. All Gymnastic appliances should be of the very best material and manufacture, that the risk of ACCIDENTS may be reduced to a minimum.

All Apparatus guaranteed of first class make and best material.

Revised Price List of Gymnastic Apparatus sent post free on application.

**TERMS : CASH on or before delivery of Goods.**

*The package and fixing of Apparatus charged extra at a moderate price.*

**ESTIMATES AND PLANS FOR FITTING UP GYMNASIA FREE OF CHARGE.**
